- Proven experience as a Video Editor with a strong portfolio
- Proficiency in industry-standard video editing tools
- Strong sense of storytelling, pacing, and visual flow
- Creative eye with attention to detail and sound design
- Good communication and collaboration skills

Role Overview:

As the Video Editor at Mercury Architects, you will help bring our designs, projects, and stories to life through high-quality video content. Your work will be essential in showcasing our brand on social media, the website, and across digital platforms. The ideal candidate is not only technically skilled but also understands how to tell compelling stories that align with our design philosophy.

Key Responsibilities:

1. Video Creation & Editing

- Edit raw footage into polished videos for social media, project showcases, events, and internal uses
- Create engaging and shareable content to enhance brand visibility and reach.

2. Social Media Integration

- Produce reels, shorts, and teasers suited for Instagram, LinkedIn, YouTube, and Facebook
- Collaborate with the social media team to deliver on-brand content

3. Content Development:

- Work with architects, designers, and marketing team to plan and storyboard visual narratives
- Enhance video aesthetics through color grading, framing, and editing rhythm

4. Optimization & Delivery:

- Export videos in various formats for web and mobile platforms
- Organize and manage media assets for easy access and reuse
- Stay updated with the latest video trends, formats, and tools

5. Collaboration:

- Work closely with the marketing, sales, and customer support teams to align social media efforts with overall business objectives
