

## RUDDER SHAFT LENGTHS

### **7 1/2" (19 cm)**

V8 (1st Gen.)  
V10 Double

### **6 1/2" (16.4 cm)**

V8 (2nd Gen.)  
V12  
V14

### **5 5/8" (14.3 cm)**

V10  
V10L  
V10 Sport  
(All Generations)

#### NOTES:

Dimensions are  $\pm 2\text{mm}$   
Print page at actual size for 1:1 scale.

Always insert rudder pin into the bottom most hole when rudder is inserted fully into boat. It is not necessary for rudder pin to 'hang' or rest on interior tube, it only needs to be clamped within the T-bar.

In a pinch, the medium length shaft can be cut down to fit V10 series boats. A sharp hacksaw will cut the shaft easily.
