

PROFESSIONAL PROFILE

Chemical engineer with extensive experience in bulk solids handling and processing. Provided solutions to powder handling problems and recommended bulk solids handling equipment for clients in the pharmaceutical, chemical, glass, biotechnology, lithium-ion battery, plastics, food, and powdered metal industries. Expertise includes drying, fluidizing, feeding, dispersing, coating, conveying, storage, extrusion, reacting, blending, granulating, and testing. Expert on handling and processing challenging materials such as carbon black and fumed silica. Professional experience includes manufacturing, research and development, consulting, and training. Spray drying knowledge includes bench, laboratory, pilot, and commercial equipment. Author of subsection on powder flow and hopper and chute design in Perry's Chemical Engineers' Handbook, 9th edition. Licensed Professional Engineer. American Institute of Chemical Engineers Fellow.

QUALIFICATION SUMMARY

Powder handling and processing

- Designed hoppers, bins, silos, transfer chutes, granulators, and feeders for handling bulk materials handled in the chemicals, energy, pharmaceuticals, biomass, lithium ion battery, and plastics industries.
- Developed continuous process for removing THC or CBD from cannabis.
- Optimized flow properties of pharmaceutical formulations.
- Determined causes of caking of pharmaceutical and food powders and provided remedies.
- Developed patented air-assisted hopper for handling powdered metals.
- Designed extension hopper that prevents compaction of powder in gravimetric feeder so that desired powder discharge rate is maintained during filling cycle.
- Designed innovative moving bed reactors, heaters, and dryers for processing powders.
- Designed, fabricated, and installed moving bed conditioner for removing static charge from powders.
- Designed bins and feeders for handling lithium-ion battery anode and cathode powders.

Process development

- Developed and implemented continuous granulation process at contract manufacturing organization (CMO).
- Designed and implemented pilot plant process for surface modification of fine particles.
- Designed moving bed induction heater process for manufacturing highly conductive grades of carbon black.
- Designed, fabricated, and installed moving bed conditioner for preventing static charge of powders.
- Co-inventor of continuous solvent-free process for removing cannabinoids from cannabis.
- Scaled up spray dryer-based process for attaching polymers onto inkjet pigments, key accomplishment in the launch of new products for printing companies.
- Designed and implemented pilot plant process for surface modification of fine particles.
- Reduced the cost of spray drying at toll manufacturer by stretching capacity of existing process equipment.

Project management

- As project engineer, managed testing programs and designed or recommended equipment for storage, handling, and processing of bulk solids.
- Executed research and development activities through stage-gate process.
- Evaluated CMO (contract manufacturing organization) options and managed projects at selected organizations.

Spray drying

- Managed pilot plant for scaling up spray drying processes for isolating emulsified solids.
- Established operating conditions for Buchi, GEA/Niro, and Roberts Box spray dryers with evaporative capacities ranging from 1 – 1,000 kg/hr.
- Developed novel method for improving flowability of spray-dried powders.
- Stretched capacity of existing commercial spray dryer by 40 percent.

Materials science

- Established testing laboratory for measuring fundamental flow properties of bulk solids.
- Evaluated and authored operating procedures for Schulze, Peschl, Brookfield, and Freeman shear cell testers.
- Fabricated bulk solids permeability and wall friction testers.
- Interpreted inverse gas chromatography (surface energy) and sorption test results.

PROFESSIONAL EXPERIENCE

GREG MEHOS & ASSOCIATES LLC, WESTFORD, MASSACHUSETTS

Greg Mehos & Associates (www.mehos.net) provides consulting, testing, and training services related to bulk solids handling and processing. 2017 – present.

JENIKE & JOHANSON, INC., TYNGSBORO, MASSACHUSETTS

Jenike & Johanson is a material testing and engineering consulting company that specializes in the storage, handling, and processing of bulk solids.

- Senior Project Engineer, 2014 – 2017
- Project Engineer, 2006 – 2011

CABOT CORPORATION, BILLERICA, MASSACHUSETTS

Cabot is a specialty chemical company that manufactures fine particles and inkjet colorants.

- Lead Engineer, 2011 – 2014
- Senior Process Development Engineer, 1996 – 2006

ROHM AND HAAS COMPANY, BRISTOL, PENNSYLVANIA

Rohm and Haas is a specialty chemical company that produces acrylic monomers and polymers, ion exchange resins, and agricultural products. It is now wholly owned by the Dow Chemical Company.

- Senior Process Development Engineer, 1992 – 1996
- Process Development Engineer, 1989 – 1992

MASSACHUSETTS INSTITUTE OF TECHNOLOGY SCHOOL OF CHEMICAL ENGINEERING PRACTICE ALBANY STATION, ALBANY, NEW YORK, BOULDER, COLORADO, AND CAMBRIDGE, MASSACHUSETTS

The MIT Practice School is a program in which chemical engineering graduate students work on projects at host companies (GE Silicones, Waterford, NY, GE plastics, Selkirk, NY, Syntex Chemicals, Boulder, CO) in lieu of a master's thesis.

- Director and Assistant Professor, 1987 – 1989
- Assistant Director, 1986 – 1987

UNIVERSITY OF RHODE ISLAND DEPARTMENT OF CHEMICAL ENGINEERING, KINGSTON, RHODE ISLAND

- Adjunct Professor, 2012 – present

PROFESSIONAL AFFILIATIONS

- American Institute of Chemical Engineers Fellow; past Chair, Boston local section; past Executive Committee Member, Particle Technology Forum
- Institute for Briquetting and Agglomeration, Member, Board of Directors, Vice President
- Licensed Professional Engineer, Massachusetts

EDUCATION

- Ph.D. (Chemical Engineering), University of Colorado
- M.Ch.E., University of Delaware
- B.S.Ch.E., University of Colorado, special honors
