

LAKE TOHO ALERT

HIGHLIGHTS

Osceola County is negotiating to sell 306 acres of an undeveloped park on the western shore of Lake Toho to a company to build seven factories for lithium batteries, solar panels, and EV chargers.

This project would set a precedent for industrial development on the lake and cause serious environmental hazards.

CHALLENGES

Manufacturing wastewater and/or chemicals leaching into the soil could endanger the health of the lake and future fishing.

ACTIONS TO STOP
