

RIO LAGARTOS - LAS COLORADAS LA RUTA DEL FLAMINGO

WHAT'S INCLUDED

We will begin our journey by exploring Las Coloradas, where you will see the different bodies of water that take part in the process of salt production, some of an eye-catching color pink.

Rio Lagartos is a small fishing village in a nature reserve, a gem of nature in the Yucatan Peninsula. Here, we will enjoy a boat ride through the canals surrounded by mangrove, where you can spot a variety species of birds, such as: pink flamingos, herons, eagles, pelicans and cormorants. Part of this adventure will be rejoicing in a Mayan Bath, covering our bodies in nutrient-rich clay. We will then stop in a virgin beach to remove the clay from the skin in its crystal waters, the cherry on top of the cake.

- Round trip in A/C equipped transportation
- Tour guide
- Boat tour in the nature reserve of Ria Lagartos (mangroves, bird sighting, spring of water and crocodiles)
