

## Mission Statement:

The GVR Metal Working Club was formed by a group of experienced metal fabricators several years ago.

The current members are ready and willing to introduce new and existing members to the basic skills required for the different phases of metal fabrication.

At the present time, our facility is small, but we do have some very good equipment for such a small space.

There are various types of welding equipment, a metal turning lathe, a milling machine, a sand blasting unit, and sheet metal fabrication tools in the shop.

Provisions for future classes are in development, for the skill and safety requirements, for the use of these specific tools.

The Metal Shop is located at West Center, right behind the GVR Administration Offices

Annual Dues \$40
