Ai1 Tool- How To

1. Turn the buckle with the prongs facing to the right.
2. Make a loop with one end of the strap, and thread the front prong through the loop.
3. Create another loop at the opposite end of the strap & thread the rear prong through the new loop.

4. Point handle of the Ai1 tool towards the buckle, and position the loose top strap through the large slot in the tool.

4

5. Rest the blade of the tool against the edge of the load, pinching the tail strap against the bottom strap.
6. Pull the handle of the tool toward you to apply tension to the strap. Repeat as necessary.
7. Cut the strap with the Klever Kutter.
