Version 1.0 (2023-01-01) - Revised Report

Test Methodology

The following methodology was used:

- The test results were obtained using a validated method for the detection and quantification of cannabinoids in Cannabis flower, as per the requirements of the Cannabis Control Act.
- Results are reported in milligrams (mg) per gram (g) of sample.
- Sample information that is listed on this Certificate of Analysis is based on information provided by the customer and is not verified by Cannabis ChemLab.
- The certificate of analysis represents the analytical results of the sample and does not constitute a guarantee of the quality or purity of the sample.
- The test results represent the average results of the sample and do not represent the results of individual samples.
- The Certificate of Analysis is a report of the results of the analytical method used and does not constitute a guarantee of the quality or purity of the sample.
