To whom it may concern:

I am writing to let you know that I support the Best Value Proposal Evaluation system used by Mr. Gary McClure in aiding Medina County to select contractors. Medina County is in the process of building a courthouse annex (approximately \$10,000,000) and a jail addition (approximately \$12,000,000). The following are some of the advantages that I feel we gained by using Mr. McClure's system.

1. It protected our interests by warning of low proposals.
2. It protected us from overpaying for services based on extremely high technical scores.
3. It requires one evaluator rather than having to use a subcommittee, which saved us time and expense.
4. It is uniform, consistent and unbiased.
5. It provided solid reporting to keep in our files, which clearly outlined how scores were developed. Additionally, it is a great record to have should someone protest how the final choice was made.

I strongly support this system and recommend it to others who go through the processes Medina County just completed to choose the best contractors. Please feel free to contact me should you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Chris Schuchart".
