LONGTERM OUTDOOR STORAGE NO MATTER THE CLIMATE

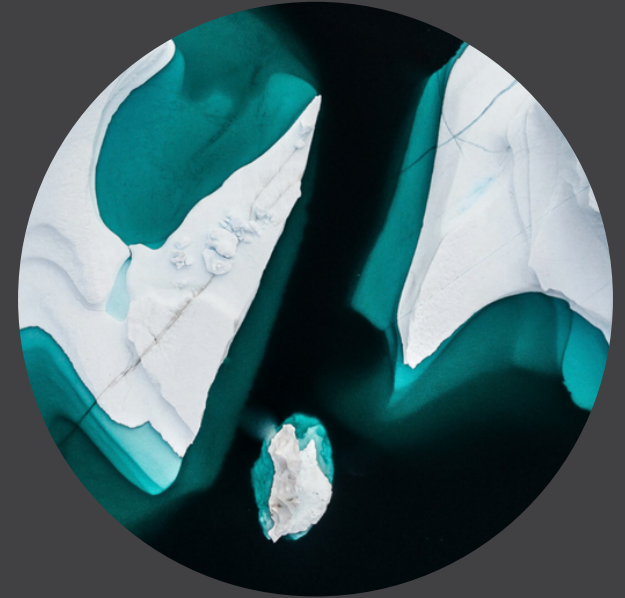

SONORAN

Designed for warmer climates. The Sonoran trays are loaded with UV Stabilizer to protect the trays outdoors under intense sun, to ensure long-lasting durability. Available in either recycled or virgin materials, the choice is yours.

BOREAL

Designed for colder climates. Boreal's raw material is designed to excel in temperatures down to approximately -30 degrees Celsius. Made from virgin materials our formulations are meticulously engineered to resist cracking even in harsh environments. They are treated with UV Stabilizer to ensure long-lasting durability.

ARCTIC

Designed for extreme cold climates. The Arctic trays are manufactured from high specification virgin material. The raw material used is designed to cope with temperatures lower than -70 Celsius. They are treated with UV Stabilizer to ensure long-lasting durability.
