

MADE IN CANADA

CORES SAFE™

SLIMLINE

OUR GROUP

Leading geological supply company

Importers, exporters, distributors & manufacturers of numerous items required by 'outdoor' professionals.

Humans united with geology

Global platform to connect, laugh, share ideas, information & knowledge with the wider geology community.

Manufacturer of the world's safest core tray
Currently made in Australia, Canada & India.

Our core values are protecting your key assets.

PEOPLE

Eliminating OH&S issues & providing efficient workflows.

CORE

With changing commodity demands & advancing technologies, historical core could hold the answers.

ENVIRONMENT

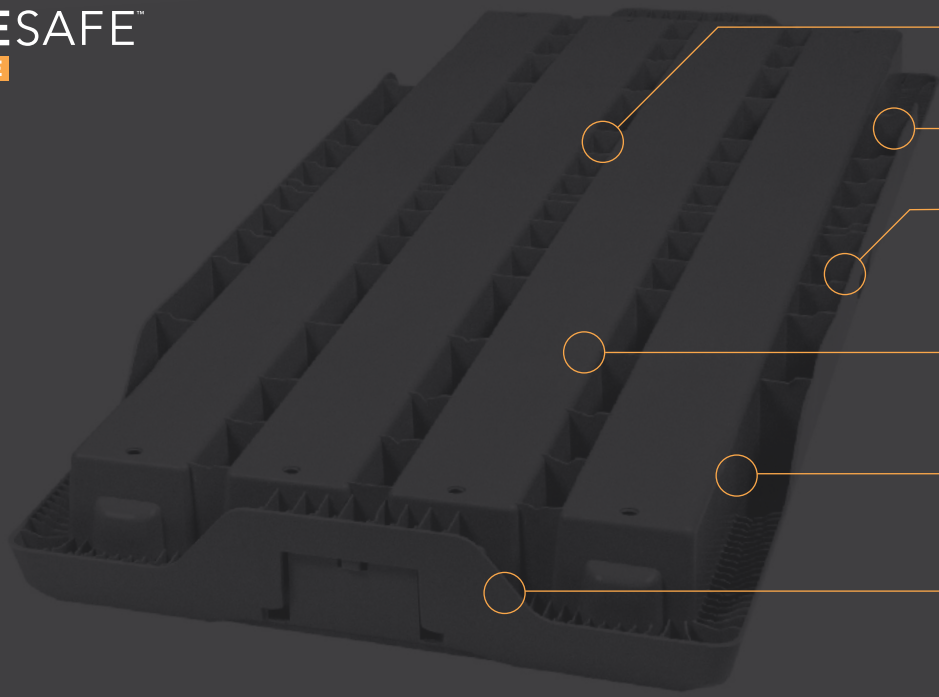

Our trays are recyclable & reusable.

PROFIT

Diamond Drill Core is hugely valuable & should be treasured as the useful resource that it is.

Ribbing in each channel
to keep the core oriented & stabilized

Resistance & durability
impact & strength tested

No sharp corners
to help reduce injuries

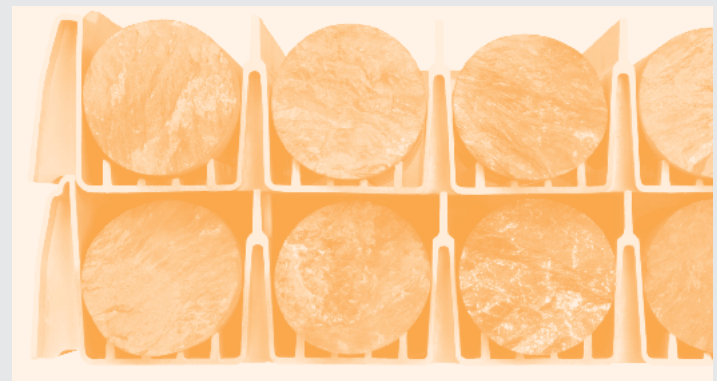

Our unique flat bottom
trays work with roller
conveyors, both lengthways
& sideways

Slide & stack capability
our trays have excellent
stability with a simple slide
& stack feature

Important features
side & end handles & secure
one piece clip on lid

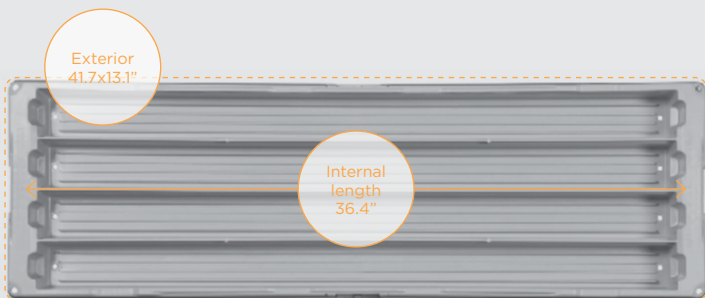

Easy to use one piece
clip on lid
