Speed and efficiency - these are the main characteristics of smallest Bocker truck-mounted crane. Despite its compact and extremely light design, the AK 35/3000 still impresses by strong performance. With an extension length of 35 m and a working range up to 26.6 m, this crane reaches impressive working radiuses. The fly jib is mechanically extendable up to 11.2 m so that the working area can be optimally used.

Using the AK 35/3000 you also benefit from the well-proven advantages of Bocker crane technology, e.g. the sensitive telescopic functions when working with flat boom angle and the minimum slew radius.
