- Higher focus on CX helps improves client journey
- Compliance & audit as part of software platform

## LEARN MORE & USE CASES

### Loan Origination Services

#### Overview

Ripcord provides loan origination services to the mortgage, personal and auto loans markets. This covers support of customer acquisition document management, account set up and data entry, compliance approvals workflow and processing integration. Ability to handle case files such as deal jackets and loan packets as part of wider services platform. Additional content services, including data accessibility in different views, exporting data capabilities and API integration to other systems.
