# The Problem: Broken Sales Processes

1

## Limited Selling Time

Sales reps spend only 1/3 of their time actually selling.

2

## Manual Tasks

2/3 of time is spent on record keeping, lead management, and data entry.

3

## Inefficient Growth

Hiring more reps doesn't fix the underlying process issues.

# The Solution: AI-Powered Sales Optimization

- 1 Automated Busy Work**  
AI handles tedious tasks at scale, freeing up human reps.
- 2 Increased Selling Time**  
Sales reps can spend 90% or more of their time actually selling.
- 3 Personalized at Scale**  
Generate more volume without losing personalization.

# AI Sales Assistant Responsibilities

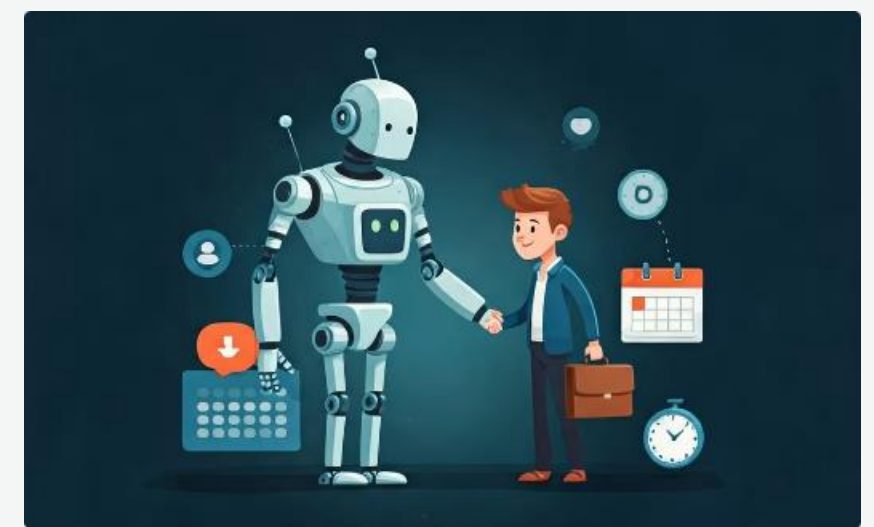

## Lead Generation

Generates new leads via outbound cold calling and social media messaging. Also captures inbound leads via multiple channels.

## Lead Management

Qualifies and scores leads to optimize CRM usage. Sets appointments and manages follow-ups.

## Relationship Nurturing

Maintains connections through personalized calls. Manages speed-to-lead.

# Streamlined Sales Process

1

## AI Opportunity Generation

AI creates new sales opportunities from pipelines.

2

## AI Lead Nurturing

AI warms up, qualifies, and nurtures leads.

3

## Human Closing

Human reps meet prospects and close deals.

4

## AI Follow-up

AI handles post-sale relationship building.
