Splan Event Management Summary

Tenants Management

Property Management or Building Owner to offer tenants a secure and dedicated partition of the property owners visitor management system

Allows for entrance to lobby turnstiles, while still offering tenant their own secure self managed solution

Processing of visitors can be done by building owner's staff in the lobby or at the front desk of the tenants space

Self Service kiosks to manage Tenant Visitors

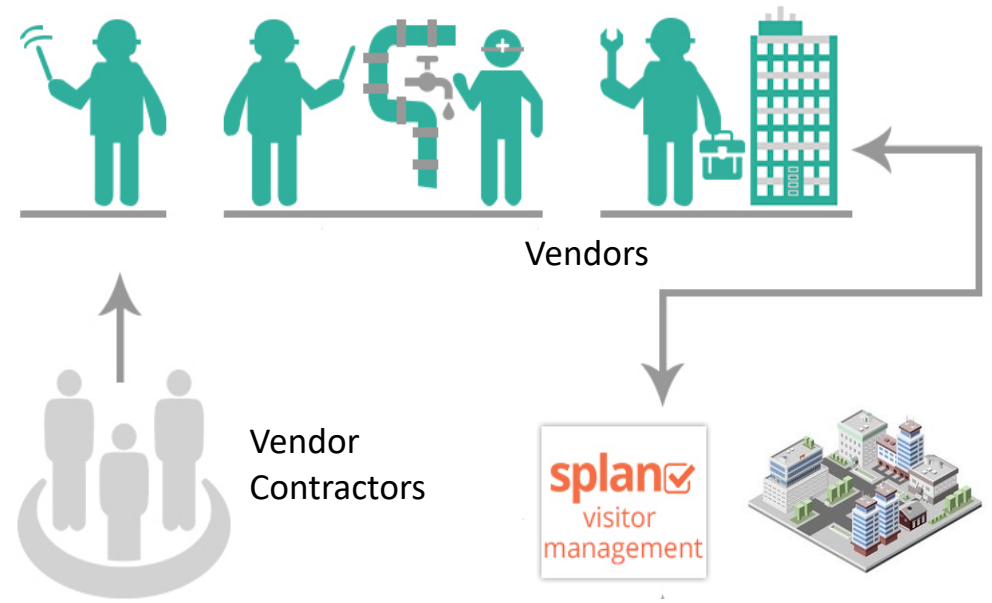

Splan Vendor Contractor Management

Vendor Module allows for secure and holistic record keeping and reporting of all vendor and contractor activities on site for companies using Splan Visitor

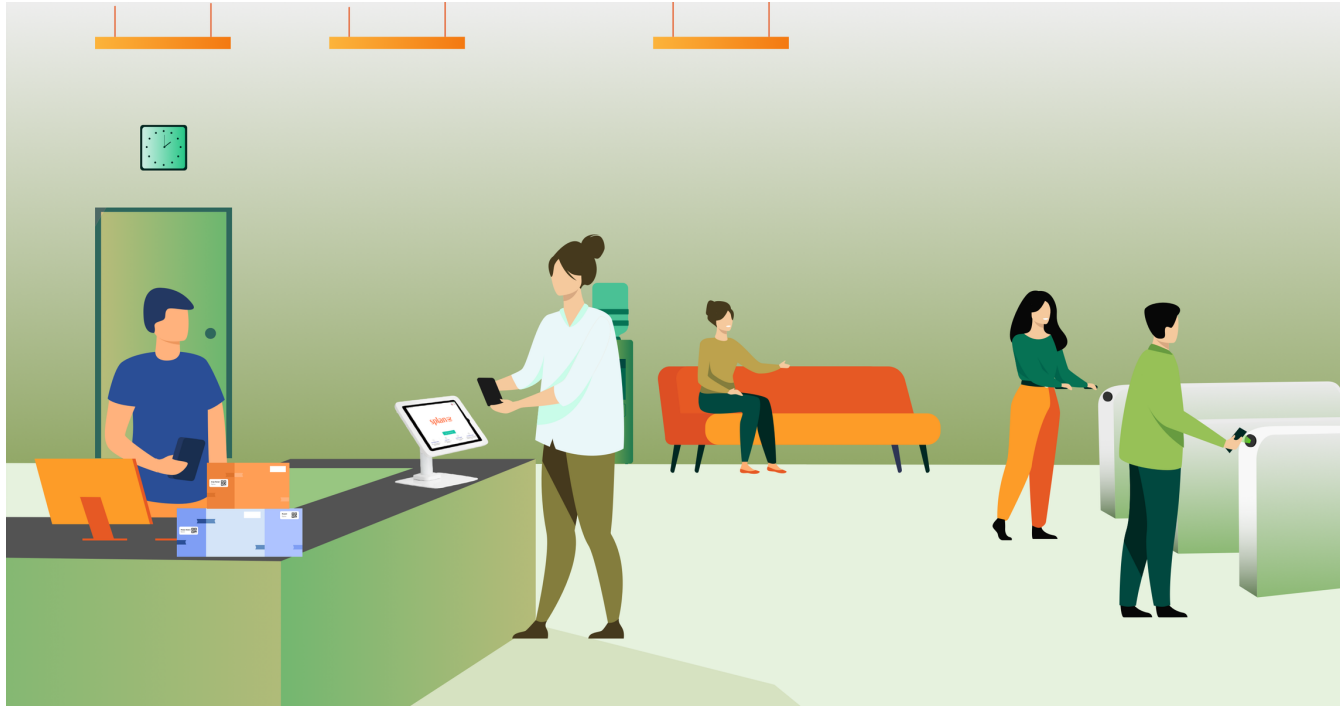

Vendor Module offloads workflow process responsibility to trusted Vendor partners

Verification of required licenses, credentials and identification can be responsibility of Vendor company as part of contract

Potential \$\$ cost savings through fraud reduction in billing

Mobile Credentials

Visitors use their mobile phones for check-in

Upon Check-in, mobile credentials are downloaded onto their phones through the Splan SignInEasy app

Visitors hold their phone to the reader and open

Thank You
