

Capability Statement

Anthony Foley/Owner

Core Competencies

AKF Energy Electrical Contractor LLC provides reliable electrical services for small commercial and government projects across Northern Virginia and the Washington, DC region. We specialize in lighting, troubleshooting, and small-scale electrical scopes, emphasizing safety, compliance, and operational continuity.

Electrical troubleshooting and diagnostics (120/208V & 277/480V systems)

Lighting installation, upgrades, and controls

Circuit additions and load expansions

Electrical repairs and maintenance

Level 2 EV charger installation

Low-voltage and access control wiring

Differentiators

Single Point of Accountability – Direct oversight from estimate through project completion ensures consistency, responsiveness, and clear communication.

Occupied Facility Expertise – Work is performed efficiently with minimal disruption to ongoing operations, maintaining safety and continuity.

Scalable Workforce Network – Access to a reliable subcontractor network allows for flexible scaling to meet varying project demands.

Small Project Specialization – Focused on streamlined execution of government projects valued at \$10,000 or less, delivering speed and precision.

Clear Communication & Scope Control – Proactive coordination, defined scopes, and disciplined project management reduce risk and prevent cost overruns.

Past Performance

Arlington State Trooper Station 45 – Resolved lighting deficiencies through system corrections and targeted upgrades (7.6.2024)

Loudoun County State Trooper Station 10 – Performed electrical diagnostics and corrective repairs to restore system functionality (9.18.2025)

Manassas National Battlefield Park – Conducted circuit troubleshooting and repair to ensure reliable electrical operations (1.8.2026)
