

SPIRITUAL ECSTASY SOUND VOYAGE WITH REBECCA DRU & MISTI COOPER

Rebecca Dru & Misti Cooper are taking you on a **Sound Voyage**...a journey within. Music is a universal language which brings us all together on a common ground. It's medicine for our soul, permeating our heart, allowing us to love every part of ourselves through the sonic experience of emotional catharsis and release. Close your eyes, let go of your head, listen with your body to the sounds of our Crystal Alchemy Singing Bowls. Sing with us to the drone of a Shruti Box and experience the effects throughout your body creating a masterpiece of sound. Wind down to the resonance of Koshi Chimes...in a portal to contemplation, inner peace, and heart-centered connection.

From the universal perspective of creation, our bodies are made out of sound, light and love. It is the frequencies that interact with one another that build the nucleus of a cell. Therefore sound has the power to change our vibration and lift us out of negativity and disease at the cellular level of consciousness. Music has been scientifically proven to reduce stresses, anxieties, isolation and worries in our lives and help improve memory and focus.
