

# Plumbing Fixtures

## Where to splurge:

- Kitchen
- Primary bathroom
- Powder room
- Bar
- any other highly used or visible spaces
- Wall-mounted fixtures are more expensive but make a glamorous impact

## Where to save:

- Secondary bathrooms
- Laundry/utility
- Use deck mounted faucets in these areas

## Exception:

- Pot fillers can be pricey and are usually visible, UNLESS you are me, and opt to use one as your coffee maker filler
- HIGHLY RECOMMEND. Our potfiller was \$80 on Amazon, [linked here!](#)

## Tips:

- Best to purchase through plumbing supplier vs big box (HD/Lowe's)
- Internal parts at big box stores are often plastic vs metal. Metal is higher quality and will last longer
- Try to stick with Kohler, Moen, Delta, ie
- It's important for your builder/plumber to know which brand you select – valves are not universal in some specific areas (showers, ie), and plumber do tend to specialize in a particular brand
