

# Integrated Pest Management (IPM) Webinar

- **Tuesday, March 30, 2021 (9am – 12 noon)**
- **Cost:** \$25 LNB/PEI Members  
\$40 Non-Members
- **Pre-Register** by Thursday, March 25<sup>th</sup> to receive appropriate links to Zoom video conference details.
- **2 CECs** available for IPM Certification and Landscape Industry Certification

*Don't miss this rare spring opportunity to join **Ken Browne** in his presentation for turf practitioners. Take advantage of the chance to question the man who reviews and audits the volumes of IPM data collected from IPM accredited companies registered with Plant Health Atlantic each year. It is sure to be a discussion that will inform and give clarity.*

## Agenda:

**9:00 am Greetings and Updates - Landscape NB and Plant Health Atlantic Council**

**9:15 am Calibration, Tank Mixing Calculations & Record Keeping - Ken Browne, PHAC Auditor**  
Do you dread calculations and reporting required as turf practitioners in our IPM world? Perhaps you haven't had a crack at it yet? Or maybe you're having trouble with equipment or application methods and techniques? No worries! Let's review the process required to ensure that once a decision is made to apply a pest control product, it is done with properly calibrated equipment and mixed at the best label recommended application rate for maximum control.

**10:15 am Break**

**10:30 am Product Applications, Government Legislation & PHAC – Ken Browne, PHAC Auditor**  
Confused by the regulations and which path to follow? Join us as we review the NB Environment & Local Government 2021 Permit conditions, Applicator Certification (who/when/on-line training & exam), process for getting Provisional Permits, and questions frequently asked of the Department staff. Brush up on record keeping and common errors in filling out the Full Desk Audit for IPM Accreditation. Also learn about past incidents of violation and potential public relation issues.

**11:15 am Still Puzzled by Pests and Tools of the Trade in an IPM Program? – Q & A - IPM Team**  
Stick around for a chance to dig deeper into guiding principles of an IPM program. The opportunity just may make your season ahead the least pesty yet! Be sure to reach out to us with your questions and concerns about product status reviews, non-pesticide approaches to pest management and more. If you have a topic you would like clarification on, email Karen at [kvgarden@rogers.com](mailto:kvgarden@rogers.com) and we'll be sure to have it addressed by our team on this webinar.
