Manufacturer of water treatment plants, water treatment components, filtration plants, softener and DM plant, micron filters, commercial RO systems, Ultra violet sterilizer, Ozone generator, dosing systems, Domestic RO system, Lab equipments.

## Our Services

- ★ Mineral Water Plants
- ★ Water Treatment Plants
- ★ Domestic Iron Remover
- ★ Softener & R.O Plants
- ★ Sewage Treatment Plants
- ★ Effluent Treatment Plants
- ★ Accessories & Services

## **Products:-**

### Mineral Water Plants

*We are engaged in manufacturing and exporting a wide range of machines, tools and projects. These projects are designed and developed by our team of expert professionals, who have years of experience. The materials we use under this kind of projects include Pet bottle blowing Machine, Pet Bottle Rinse, Fill, Cap, Label Machine, 20 Ltr JAR Washing & Filling Machine and Injection Molding Machine, etc. Our purification system includes Raw Water feed Pump, Chlorine Dosing system and Multi Media Filtration for Coarse filtration and many others. Our purified water is stringently tested using in-house Water Testing laboratory.*

## Water Treatment

*Our company efficiently undertakes the job of setting up wastewater treatment plants. These are set up for the need of treatment of the water waste which is produced by the companies. It involves the performance assessment of industry specific effluent treatment plant. Apart from this, we are also engaged in the process, system design and evaluation of the treatment facility. We sincerely perform our set of analysis and consultation on operation and maintenance of ETPs/CETPs. Further, the existing ETP is upgraded after proper evaluation and selection. Once, our water treatment facilities are implemented treatment ability and feasibility services are conducted.*

## Iron Remover

*With the assistance of our professionals, we are engaged in providing Iron remover Plant, which is manufactured at par with the set industry norms. These are useful to treat water when it becomes brackish color, rusty sediment, bitter or metallic in taste. This is done by oxidation accompanied by the dissolved oxygen introduced into the water. We are trusted enterprise offering optimal quality Iron Removers that are devised by our adroit personnel at par with the international quality standards. The product is acknowledged for purifying water efficiently by removing fine iron particles from water. Due to credible and hassle free performance, this product has assisted our firm to strive towards the excellence across the industry.*

## Softener & R.O

Engaged in offering the most distinguished range of Water Softener Plants in Chennai in different capacities, we serve several sectors through our high technology oriented approach. Developed using sophisticated technology; these plants are capable of softening the hard water and converting it into commercial water with total hardness quotient.

## Effluent Treatment Plant or ETP

ETP is purifying the industrial waste water. This purified water is reused for production work or release to environment.

The ETP Plant works at various levels and involves various industrial waste waters i.e. Tannery, pharmaceutical, biological, refineries, dairy, ready mix plants & textile etc.

## Sewage treatment Plant or STP

Sewage treatment is a procedure of expelling impurities from effluent, both domestic and runoff. It comprises chemical, biological and physical procedures to evacuate chemical, biological and physical impurities. Further, make a waste flow (or processed waste water) and a sludge or solid waste ideal for reuse or release back into the nature.

Our STP plant require less minimum area for mounting and Easy operate

*Our company's having the capability to supply any range of capacities of RO Plants, Mineral water plants, SS & MS Storage Tanks, Iron removers, water softeners, Sewage Treatment Plant / Waste water treatment plants including packaged treatment plant – installation and commissioning.*
