DYNAMITE SOLID SOLID DISHMACHINE DETERGENT

DESCRIPTION:

DYNAMITE SOLID is a solid non-chlorinated dishmachine detergent. Its high alkaline formula provides for quick and thorough soil removal to leave dishes and flatware sparkling clean. DYNAMITE SOLID is designed for use in soft to moderate water hardness and moderate to heavy soil loads. It is generally used in high temperature dishwashers. This is the product of choice when using silver service ware and concerned with soft metal safety.

HIGHLY CONCENTRATED:

DYNAMITE SOLID's highly concentrated formula provides economical and excellent removal of greasy dried on food soils. Steak or Chop houses as well as Italian restaurants benefit from its grease cutting ability.

FREE RINSING:

Formulated with high quality soil-suspending agents, quality defoaming agents and biodegradable surfactants allows for superior rinsing and great results. Food soils will not re-deposit on the ware being washed.

CONVENIENT DISPENSING:

The solid encapsulated packaging provides for safe handling of the product as well as being easy to use.

DIRECTIONS:

Remove the protective shipping cap from the capsule of DYNAMITE SOLID and place it inverted into the detergent dispenser. The concentration of the detergent is set according to the type of machine, water conditions, and soil loads encountered. Your Sound Restaurant Supply Representative is skilled at determining these details and selecting the proper concentration.

FOR FURTHER INFORMATION REFER TO THE MATERIAL SAFETY DATA SHEET
