JET KLEEN

LIQUID LOW ENERGY DISHMACHINE DETERGENT

DESCRIPTION:

JET KLEEN is a liquid detergent designed to provide clean sparkling dishes in a low energy dishwashing machine. This premium product combines the cleaning power of powders with the convenience of a liquid compound. This results in an effective and economical detergent. JET KLEEN is formulated with a combination of water softeners, soil-suspending agents and biodegradable surfactants. No harsh, dangerous caustics or alkalis are used in order to make the product safer for the environment and employees.

OPTIMUM RESULTS

JET KLEEN is formulated to provide excellent results in low temperature dishwashers. Optimum operating temperatures are 120°F to 140°F.

EXCELLENT HARD WATER CONTROL:

Special components in JET KLEEN helps to prevent hard water scale build-up in the dishmachine or on dishware operating in soft to moderately hard water.

FREE RINSING:

The biodegradable surfactants and water conditioners in JET KLEEN leaves glasses and dishware sparkling clean. Food soils in the wash water will not re-deposit onto the dishes or dishmachine surface.

CONVENIENT DISPENSING:

JET KLEEN is dispensed directly from the shipping container to the wash tank of the dishmachine via the built-in pump system. This makes for a clean, safe way to handle the product.

DIRECTIONS:

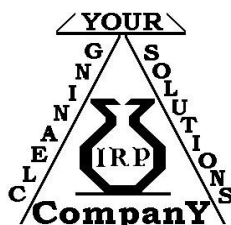

Remove the protective shipping cap from the container and insert the detergent pick-up tube. The product is dispensed using the detergent pump on the low energy dishwasher and is self-priming. Replace the container when there is approximately 2" of product left in the container. Add the remainder to the next container to reduce waste. Discard or recycle old container. Normal use concentrations are from 7ml to 10ml per load in a single rack dishmachine. Actual concentrations are set according to the type of machine, water conditions and soil loads encountered. Your Sound Restaurant Supply Representative is skilled at determining these details and selecting the proper setting.

FOR FURTHER INFORMATION REFER TO THE MATERIAL SAFETY DATA SHEET

PACKAGING:

Available in 5 gallon pails and 4 gallon cases.
