SPARKLE DRY

PREMIUM LIQUID RINSE ADDITIVE

DESCRIPTION:

SPARKLE DRY RINSE ADDITIVE is a premium liquid rinse additive for high temperature dishwasher applications. This high quality drying agent is automatically injected via our electronically controlled detergent/rinse dispenser. It works by breaking the surface tension of the water, thereby reducing foaming and preventing the formation of water spots, streaks and films on dishes, glasses and flatware.

HIGHLY CONCENTRATED:

SPARKLE DRY RINSE ADDITIVE is a concentrated blend of surfactants designed to be effective in most water conditions at ultra low concentrations. This economical formula is most effective at temperatures of 160°F or above.

BIODEGRADABLE FORMULATION:

All components of SPARKLE DRY RINSE ADDITIVE are biodegradable.

DIRECTIONS FOR USE:

Remove the lid from the shipping container. Place the end of the pickup tube from the dispenser in the rinse additive container. Replace the container when the product is within 2" of the bottom of the container. Add the remainder to the next container to reduce waste. Discard or recycle old container. The feed rates are set to provide optimal sheeting action on the ware. Use concentrations vary according to the type of machine, and water temperature and conditions. Your Sound Restaurant Supply Representative is skilled at determining these details and selecting the proper setting.

FOR FURTHER INFORMATION REFER TO THE MATERIAL SAFETY DATA SHEET

PACKAGING:

Available in 5 gallon pails and 4 gallon cases.
