WHY CONTAINERS?

Container Buildings can help you save money, time & most important the environment

30-50%
cheaper than conventional construction

75%
faster building time

75%
of all containers can be relocated

50-75
years life span

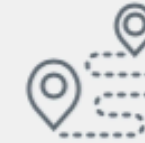

TRANSPORT

Containers can be easily transported on the back of a truck, train, plane or a ship enabling flexibility in modes of transport as per region.

MODULAR

There are multiple combinations and design possibilities when using containers.

ADAPTABLE TO LOCATION

Having been designed with a view to optimizing logistics, it can be adapted to practically any location or setting.

COST

Even with their lower construction cost, shipping container homes will last as long as traditionally built homes or even more.

Also making relocating your whole building possible in an economical way.

VERSATILE

Shipping containers are very versatile and can be used for a wide range of applications.

ECO-FRIENDLY

A 40ft shipping container weighs over 3,500KG. When up cycling shipping containers, several tons of steel are saved. Also due to minimum foundation requirements, the carbon footprints are greatly reduced.
