HEPA-4 AIR FILTRATION & PURIFICATION UNIT

COVID Funding is available to provide Sanitized Ventilation for your School Buses!

Introducing a new high capacity air cleansing unit. The HEPA-4 purifying unit by ProAir will help clean the air to protect both driver and passengers. The HEPA-4 when used in conjunction with surface cleaning and sanitizing, will help in eliminating harmful airborne particulates. The unit is easy to mount and ideal for all types of buses including school, commercial, paratransit, tour & city transits.

Advanced Features:

- Washable Pre-Filter, Merv-4, to Protect the Long Life HEPA Filter.
- HEPA MAX Filter, MERV-1 Equivalent, 3.54" Thick, Aluminum Housing with 2.75 Pleat Depth, 99.99% efficient to 0.3 microns @ 100FPM as specified for Clean Rooms, Surgery, and Chem Bio Viruses (per ASHRAE 52.2).
- Current draw: 22.2 AMPS @ 14.2VDC
- Proudly made in the USA
- Warranty: three year limited
