

Account Receivables Financing

- ▶ We can finance companies that **are start-ups, losing money, or in bankruptcy**, because accounts receivable financing is dependent on your customer's credit, not yours or the business.
- ▶ This loan is **not a "debt"**; you are selling an asset. It is more than just an asset sale to outsource your accounts receivable department.
- ▶ Factors provide valuable services. They **check your customers' credit for you**, notify you of bad risks, and provide detailed monthly statements.

Use the money to:
