REDLAND – FROM EGYPT'S FERTILE LAND TO THE WORLD

PROUDLY
EGYPTIAN

From Egypt's Fertile Land to the World

RedLand Trading & Investment is an Egyptian company specializing in the **sourcing, trading, and international export of agricultural products and foodstuffs**, connecting the richness of Egypt's fertile lands with markets around the world.

Since our establishment in **2017**, we have built our business on a strong foundation of **professionalism, integrity, quality, and long-term partnerships**. Our experienced and highly qualified team combines in-depth knowledge of the Egyptian agricultural sector with a strong understanding of international market requirements, enabling us to deliver reliable sourcing and trading solutions to customers worldwide.

At RedLand, we are committed to maintaining **consistent quality, competitive commercial solutions, and dependable service** throughout every stage of the supply chain. We work closely with trusted growers, producers, suppliers, and logistics partners to ensure that our products meet the expectations of international

buyers in terms of **quality, specifications, packaging, documentation, and timely delivery**.

Our approach is driven by **continuous development and innovation**. By embracing advances in technology, agricultural practices, market intelligence, and supply-chain management, we continuously adapt our operations to evolving global market demands and identify new opportunities for our partners and customers.

Whether supplying fresh agricultural produce or food commodities, RedLand Trading & Investment strives to be more than a supplier—we aim to be a **trusted international trading partner**, delivering quality products from Egypt with reliability, efficiency, and a commitment to long-term business relationships.

Your Trusted Partner for Agricultural Sourcing, Trading & Export

RedLand Trading & Investment provides **end-to-end agricultural trading and supply-chain solutions**, connecting trusted Egyptian farmers, growers, and producers with buyers and markets across the globe.

Our integrated approach enables us to manage the journey from **farm and producer to international destination**, providing our customers with a reliable single point of contact for sourcing, quality, packing, logistics, documentation, and delivery. With strong knowledge of agricultural commodities and international markets, we facilitate the sourcing and movement of a diverse range of products, including **fresh fruits and vegetables, grains, oilseeds, sugar, coffee, and other food commodities**.

Agricultural Sourcing & Procurement

We identify and source products from reliable farmers, growers, producers, and suppliers, selecting partners according to product quality, specifications, availability, and market requirements.

FRESH PRODUCE PACKING & EXPORT

We specialize in the **sourcing, sorting, grading, packing, and international export of Egyptian fruits and vegetables**, preparing products to meet the specifications and requirements of international buyers.

COMMODITY TRADING & BROKERAGE

We facilitate the trading of selected agricultural commodities and, where applicable, provide **brokerage and market-specific sourcing services**, supported by our knowledge of regional markets and supply conditions.

QUALITY CONTROL & COMPLIANCE

Quality is integrated throughout our supply chain. We coordinate product inspection, specifications, packing requirements, documentation, and compliance with applicable **international food safety and quality standards**.

LOGISTICS & INTERNATIONAL DISTRIBUTION

We coordinate the movement of products by **land, sea, and air**, working with logistics and shipping partners to support efficient handling, transportation, and delivery to international destinations.

STORAGE & SUPPLY-CHAIN MANAGEMENT

From procurement through shipment, we coordinate the necessary storage, handling, consolidation, and distribution activities to maintain product quality and ensure smooth supply-chain execution.

TECHNICAL & MARKET SUPPORT

Our team provides practical technical and market guidance related to **product specifications, sourcing, packaging, handling, export requirements, and market opportunities**, helping customers make informed purchasing decisions.

ONE PARTNER. ONE SUPPLY CHAIN. GLOBAL REACH.

At RedLand, we combine **Egyptian agricultural resources, market knowledge, supplier networks, quality management, and international logistics** to provide customers with a dependable and efficient sourcing and export experience.

CHARCOAL

PLANT BASED CHARCOAL

Egyptian Plant-Based Charcoal — Pure Heat, Natural Origin

Egyptian plant-based charcoal is produced from carefully selected natural biomass, offering **high-quality combustion, consistent heat, and a clean, natural character**. Produced using controlled carbonization processes, it is designed to provide dependable performance for both traditional and modern applications.

Known for its **steady heat, low moisture, long-lasting burn, and consistent performance**, Egyptian charcoal is suitable for a wide range of uses, including **barbecue, grilling, food-service, restaurants, hospitality, and traditional applications**.

CUMIN

Egyptian Grilling Charcoal — Long-Lasting Heat, Exceptional Performance

Egyptian grilling charcoal is produced from carefully selected **natural plant-based materials**, delivering reliable heat and consistent performance for grilling and barbecue applications. Its controlled carbonization process helps produce charcoal with excellent burning characteristics and dependable quality.

Designed for **steady, long-lasting heat and efficient combustion**, our grilling charcoal is suitable for **restaurants, barbecue establishments, hotels, catering companies, food-service operators, and home grilling enthusiasts**.

SESAME

Egyptian Shisha Charcoal — Clean Heat, Long-Lasting Performance

Egyptian shisha charcoal is produced from carefully selected **natural plant-based materials**, offering consistent heat and reliable burning performance for shisha and hookah applications.

Designed for a **steady, controlled, and long-lasting burn**, our charcoal is carefully processed to achieve uniform density and size, helping provide consistent heat throughout the session.

Its low-moisture characteristics and controlled carbonization contribute to **efficient ignition, stable performance, and reduced ash**.
