ILLICIT FENTANYL DESIGNATED A WEAPON OF MASS DESTRUCTION

WHY STABILIZATION MATTERS
NIOSH recommends avoiding activities that may cause illicit drug powders to become airborne. BLOC™ provides a rapid means of stabilizing suspicious powder at the point of encounter.

THE MARITIME ENCOUNTER
Boarding teams may discover suspected narcotics far from shore, often in confined spaces and uncontrolled environments. Stabilizing an unknown powder before further handling, testing or removal adds a critical layer of protection for personnel and mission success.
