TAPER'S NOTES BY JIM WISE:

The masters were made with Sennheiser 421 mics > Sony TC D-5 cassette deck. The tape was Maxell XL II 90's and were Dolby B encoded. There were mounted on a spreader bar and hand held without the benefit of a mic stand and located midway between the stage and the soundboard. I played them back on the original D-5, and ran the analog signal through a Sony PCM R-700 (to accomplish the A/D transfer) to my PC. Using Sound Forge 4.0, the levels were normalized, and a slight NR was applied. Then Using CD architect (by Sonic Foundry), they were disc'd."
