Black Controls Company Becomes MiR Certified Systems Integrator

Barrie, ON - Black Controls Company Inc., an automation integrator located in Ontario, Canada, is proud to announce that it has partnered with MiR (Mobile Industrial Robots) as a MiR Certified Systems Integrator.

As a MiR Certified Systems Integrator, Black Controls has formalized its partnership with MiR, the global market leader in autonomous mobile robots (AMRs). MiR's autonomous mobile robots are widely recognized for their flexibility, safety, and ease of integration into existing workflows, making them ideal for a diverse range of applications.

Partners of MiR are recognized for their commitment to ensuring seamless integration of MiR's products to optimize efficiency and productivity. For Black Controls, the journey to become a MiR Certified Systems Integrator involved investments in training, testing, and development. These investments are paying dividends as Black Controls has a proven track record of taking autonomous mobile robot applications from proof of concept to fully deployed systems that exceed the end users' expectations.

"This recognition is a significant milestone for Black Controls, it's another example of executing on our vision to integrate world class automation for our clients' unique needs," said Rick Black, the President of Black Controls. "I'm very proud of our team for the hard work and ingenuity they have demonstrated when working with and applying MiR's products. As with anything new, there are going to be challenges along the way. The iterative approach our team takes with anything new, enables us to succeed."
