

TIME

One wonders where this word time came from. As I looked into Webster's Dictionary for a definition, I came across the following, "Every moment there has ever been or ever will be," and "The period during which something exists and happens." Time can also be a decade, century, season, years, or generations. Why, you ask are these definitions of time so important?

In our society today, time seems to many what we do not have enough of in a day. In our fast, very fast paced society, it seems we are running...doing laps to keep up with so called time. Cell phones, a "must" in our hands no matter where we are going, a constant use of the computer for non-incidentals, and so many other forms of electronics shape us as a person for today's society.

I am not downing the improvements but observing how many people are so caught up with "THINGS". One wonders why they are not content. There is something that is not satisfying, something missing. You ask, "What could that be?" With the very essence of our being which was created by Infinite Intelligence, there is unhappiness because there is forgetfulness of getting in tune with the higher being which is GOD.

As we live and breathe and go through continual development which should be part of our individual spiritual being, there is a little voice that we hear, or something in our minds that we need to get. But how? Just as we sit down to a meal, go for a walk, or listen to beautiful music, our minds are continually moving. Yes, you may say "I do want to smell the roses...I do want to get in touch with our Infinite Intelligence." You as an individual must take time daily to have quiet moments to commune and say what is in your heart to our Wonderful God.

You are part of this universe and part of His creation. Speaking from your heart saying thank you with words, and I LOVE YOU simply and with sincerity, will bring you comfort, answers to many questions, and the "missing" that you were going through will be subsided and happiness will be in your heart. This is not a one-day "fix". This is a daily commitment for your Spiritual well-being and a promise from God Our Father who said, "Ask and you shall receive, seek and you shall find, knock and it shall be opened to you." These are not just words but a strong COMMITMENT to each of you as a unique and special loved one. You are one of a kind and your radiance must shine like gold.
