

Directions for Uploading Photos to Flickr for Ship 550

The Account email: xo@ship550.com

The Account Password: SeaScouts79!

To upload photos:

1. Go to the camera icon on the top right
2. In the bottom left corner is a square (may be dark grey or may have a photo in it from your camera). Click on it.
3. Allow access to your photo gallery
4. Click on the images you want to upload and select "done" in the top right corner.
5. If all of the photos you uploaded are going to the same album, you can select the album by clicking on the album option, or create a new one if one hasn't been made.
6. If they are going to different albums, select upload in the top right corner. This will take you to the "Camera Roll". You can select the photos by date to add to or create a new album. You can hit the bubble above the date to select all of the photos, or choose them individually.
7. After you select the photos you want, four icons will appear at the bottom of your screen, including a file folder. Click on the file folder and then "Add to Album". You can create a new album (put the year first) or add them to any listed and then click "Okay" at the top right corner. Make sure that is the only album selected, and then click "okay" and then "upload," and they should load into the album created or selected.
