Cloth Moth Treatment Preparation

- Vacuum or shampoo your carpet and furniture, including under and in the furniture.
- Make sure the floors of closets are cleaned out including shoes
- Remove your pets' food and water containers as well as litter boxes.
- Remove all toys & clutter from your floor. Exposed floor space is a key factor in elimination.

IMPORTANT: The technician will be spraying a very light mist over as much of the floor surface as possible, including under beds and between the mattress and box spring.

People and pets should stay out for 2 hours or until the product dries.

After care: Tech will place a lure in the unit for monitoring. Lures last for 3 months. Report excessive activity to the property manager.
