Grain Beetle / Pantry Pest Treatment Preparation

- Remove items from your kitchen cupboards, pantry, drawers, counter tops, stove and fridge tops.
- Vacuum pantry, shelving, and baseboards.
- Wash all cupboards, drawers, and shelving.
- Remove everything from your pantry.
- Move appliances away from the walls.
- Remove your pets' food and water containers as well as litter boxes.
- Place all grains, flours, cereals in plastic containers to help reduce the risk of infestation. Look for the source and throw it out in the exterior receptacle.

IMPORTANT: The technician will be spraying a very light mist on baseboards and in cabinets, drawers, on shelves and in pantries.

People and pets should stay out for 2 hours or until the product dries.
