Looking for SPIN potential?

Solstice Power (1.25mm)

Hyper-G (1.25mm)

RPM Blast (1.25mm)

More Spin Potential ↕ Less Spin Potential

Lower stiffness (less control) ↕ Higher stiffness (more control)

Looking for greater CONTROL?

ALU Power Soft (1.25mm)

- Premium, tour-level poly
- Signature feel and pocketing
- Loses tension faster than other polys

PolyTour Pro (1.20mm)

- Comfortable, all-around poly
- Good tension stability

Pro Line II (1.20mm)

Max Power (1.20mm)

Pro Line II
- More power, less control (lower stiffness)
- Greater comfort and pocketing

Max Power
- Stiffer, more control oriented
- Best for big hitters

Looking for COMFORT or greater depth of shot with less effort?

X-One Biphase (1.25mm)

NXT (1.25mm)

- Multifilament strings
- Generate depth of shot with less effort
- Softer, more arm-friendly feel (good for players with injuries)
- X-One Biphase is more popular (although NXT is also very highly rated)

Synthetic Gut (1.30mm)

- Solid core wrapped with flexible filaments
- Great for beginners or recreational players
