

WHY MARINE TAPE?

Because we use what we sell!

Like many crews and contractors, our sister company, Marine Polishing, goes through tape and protection at a frightening rate. During their metal restoration projects, protection is key. Between us, we tried an array of high-end products from different manufacturers and suppliers until we came across a range we could stand behind. From the floor coverings of Swiss manufacturer, Landolt, to the Japanese design and manufactured tapes from Nichiban, we supply quality-controlled products perfectly suitable to the challenging materials found throughout on-board superyachts.

Continued market research for improved performance and more sustainable products.

With an ever-increasing number of superyachts being launched around the globe year after year, the demand for protective materials required during, paint jobs, polishing works and general maintenance is also growing exponentially.

TAPES

LOW TACK MASKING TAPE

Handy space saving pocket-sized 18m rolls, perfect for marking up damage or protecting small areas. Options to order any width from 9mm to 120mm

Standard sizes - W (mm) x L (m)

24mm x 18m (Stocked size)

50mm x 18m (Stocked size)

MEDIUM TACK MASKING TAPE

A better alternative to the industry standard 'blue tape', same adhesion, less residue. 14 day safe and clean removal. Ideal for masking straight lines.

Standard sizes - W (mm) x L (m)

24mm x 18m (Stocked size)

50mm x 18m (Stocked size)

VERY LOW TACK MASKING TAPE

Handy space saving pocket-sized 18m rolls. Very low tack, ideal for interiors and delicate surfaces like high gloss varnish, veneer, polished stone and paint.

Standard sizes - W (mm) x L (m)

24mm x 18m (Stocked size)

50mm x 18m (Stocked size)

LOW TACK MASKING TAPE

Standard 30mm & 60m widths, 25% more tape than the industry standard size (24mm & 50mm). 100m of tape on one roll, space and cost saving.

Standard sizes - W (mm) x L (m)

30mm x 100m

60mm x 100m

FINE LINE TAPE

Highly efficient, individually spun fine line tape, enabling precise edges when painting.

All available sizes - W (mm) x L (m)

6mm x 55m

9mm x 55m

12mm x 55m

DOUBLE SIDED TAPE

Heavy duty, strong adhesive double-sided tape. Scrim backing enables tearing by hand. Ideal for tent building

All available sizes - W (mm) x L (m)

19mm x 1.5m

19mm x 2.5m

19mm x 10m

HEAVY DUTY CLOTH (GAFFERS) TAPE

Long lasting, strong adhesion, offers great abrasion resistance. Good workability, can be torn by hand and easily into smaller widths.

All available sizes - W(mm) x L(m) x Thickness

50mm x 25m

FLOOR PROTECTION

LANDOLT FLOOR LINER ORIGINAL

Floorliner™ original is an especially dense nonwoven with water-impermeable sheeting. It provides ideal protection for floors and stairs, even under unfavorable conditions.

Standard sizes - W x L / 1m x 50m

LANDOLT ALL PRO ORIGINAL

Proven, highly adhesive protective fleece that meets the highest demands for mechanical protection thanks to its robustness.

Standard size - W x L / 1m x 25m

LANDOLT ALLPRO FLAME RETARDANT

ALLPROTECT FR+ is flame-retardant and is therefore ideally suited for areas with increased safety requirements.

Standard size - W x L / 1m x 25m

LANDOLT FLOORLINER VAPOR P

Floorliner™ vapor P is a nonwoven with an optimum vapor-transmitting PE sheet. The sheet provides additional protection for floor coverings from liquids during refits.

Standard size - W x L / 1m x 50m

LANDOLT FLOOR LINER ABSORB

Floorliner™ absorb is a nonwoven with an absorbent yet impermeable layer and especially dense fleece.

All available size - W x L / 1m x 50m

LANDOLT ALL PRO FLEX.

ALLPROTECT Flex is an adaptable protective fleece for all corners and edges without having any loss of adhesive effect.

All available size - W x L / 1m x 25m

PAINT & VARNISH PROTECTION

EASY PROTECT W

Fast protect W specially designed craft paper with plastic sheet protector, ensures efficient application during the masking process before working on interiors or exteriors where added liquid protection is required. The combination of yellow low tack tape and craft paper greatly reduces time and costs in avoiding having to pre-mask with paint-specific tape as the Nichiban tape for paint and delicate surfaces such as veneer, glass, or varnish is already applied to the plastic sheeting.

EASY PROTECT P

Fast Protect P is a combination of high quality craft paper and Nichiban's low tack tape, a time and cost saving product ideal for protecting painted surfaces

EASY PROTECT PE

Fast Protec PE is a combination of high quality PE film with Nichiban's low tack paint safe tape. The film has a high tear resistance to avoid tearing during demasking, and special surface treatment to avoid the risk of over-spray. The combination of low tack tape and film greatly reduces time and costs in avoiding having to pre-mask with paint-specific tape as the Nichiban tape for paint and delicate surfaces such as veneer, glass, or varnish.
