Mr. Bharat

Re: Building NMAC-India  
Ref: Your application from 18. Nov. 2015  
Att:

Dear Mr. Bharat,

We welcome you in our movement of the World Martial Arts Games Committee as our honourable National Director for India to open a National Martial Arts Committee within your Country. Please use the NMAC (not NMAGC) to publish anything and to run any national tournaments in the future.

Therefore, we, the WMAGC, would like to suggest you should spearhead NMAC- India from now on, but together with other Indian applicants, if there are any requests coming up. If we get other applicants, we let them know and refer them to you, as you are now responsible in India and they need to negotiate with you to become a member in your NMAC India. Alternatively, you offer them a position as one of the officials inside your upcoming structure. A structure you must set up within India now. You are, until end of this year (31<sup>st</sup> Dec), a member without payment. In January 1<sup>st</sup> 2016 you need to pay your membership fee for 2016 to remain as official member and National Director. We will have you listed until the next World Martial Arts Games in South Africa as trial member. During the World Martial Arts Games, we hold our annual World Congress and vote on all trial members for full membership. This means with other words, you need to support the 10<sup>th</sup> World Martial Arts Games by bringing a team of athletes and attend the Games in South Africa. While you are over in Johannesburg, you will be part of the World Congress and get your full membership within the board of the WMAGC.

We are looking forward to receive your answer and are happy to have such a honourable Martial Artist within our movement. We, the WMAGC are looking forward to a great common future, partnership and friendship between, your athletes and us. Please let us know more about your history, the number of students you have in India and the affiliation you have with other Organizations.

Best regards

Alfred Kleinschwärzer  
President WMAGC
