KEY ACHIEVEMENTS

Project Leadership

Lead cross-functional design teams including architects, engineers, contractors to successfully deliver projects from concept to completion.

Technical Design Expertise

Overcome a challenge of amending the design to fit within a new survey site plan with respect to resolving the commercial and marketing expectations communicated by the client.

Communication Practice

Play a key role in representing clients to Authorities and coordinating effectively with Builders or other stakeholders to ensure alignment on project goals, timelines, and budgets through a project life cycle.

Risk Management

Identified potential issues early in the design and construction phases and implemented mitigation strategies to avoid delays and cost overruns.
