THE #1 SUN SLEEVE ON TOUR

300+ Tour Players trust SParms every week on the LPGA and PGA Tours

BRITTANY LINCICOME

Golf Professional (LPGA) /
LPGA Tour Winner

"SParms has been an amazing addition to my golf game and has become something I really believe in and love advocating for. Their team has created such an intelligent and valuable product for both men and women. The wraps are my favorite - they protect my skin so that I can focus on my game. When wearing sleeves in the sun, their design works to keep me cool. It has become an essential part of my golf attire, and I am quite thankful for the impact it has on my career and health"

DYLAN FRITTELLI

Golf Professional (PGA) /
PGA Tour Winner

"SParms are a fantastic product that I've been wearing for a few seasons now. They do a wonderful job at protecting my skin from the sun during competition. Their entire line is super comfortable. So much so, that sometimes you forget you have them on!"

ORIGINAL | SLEEVES

New Cooling Technology

The MFT-Ice technology is activated by absorbing moisture from its surroundings to cool your body up to 5 degrees.

Low irritation even to the most sensitive skin types.

SParms have been tested by Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) as having a UPF 50+ Rating, which is the best protection you can get!

Women's Leggings

SParms Sun Protection Women's Leggings

Many who love our leg sleeves have been wanting SParms leggings. The same fabric used to make our sleeves have been used to make our SP Leggings, providing ultimate UPF 50+ protection and cooling.

The Leggings currently range from XS to XL in women in multiple colors to suit your needs.

Unlike the SParms Legs, our leggings provide additional comfort as there is no band around the thigh to hold the leg sleeves in place. Instead, our leggings have a more seamless approach with added mesh at the buttocks for greater breathability.

Designed and certified in Australia, Made in Korea.

At SParms we have worked hard to develop sun protection clothing for legs — using innovative technology to shield your skin. Our leggings will protect your lower half against 98% of UVA and UVB rays, which has earned us a UP50+ rating from ARPANSA — the Australian government body in charge of protecting citizens from radiation damage.

THERMOTECH

INSULATING FABRIC

Experience the ultimate in warmth and flexibility with **ThermoTech**. Our latest innovation in insulation technology, **ThermoTech** is expertly designed to keep you comfortable in the coldest conditions without restricting movement.

www.sparms.com

AEROFLOW BREATHABLE TECHNOLOGY

Keeps you comfortable in any weather. Our fabric's high air permeability allows for breathability, preventing build-up of sweat, ensuring a fresh and comfortable feel on the skin.

UPF50+

Winter can be equally harmful when it comes to UV radiation. Let SPARMS take care of you with our UPF50+ UV barrier technology.

THERMOLOCK INSULATION

Embrace the warmth of winter with our multilayer high density fleece insulation. Designed to trap and retain warm air, our fabric encapsulates you in a layer of comfort so you can face the cold with confidence.

FLEXFORM 4-WAY STRETCH

Our super stretchy flexible fabric gives unparalleled freedom of movement as the fabric effortlessly conforms to your body, retaining its natural shape to deliver a tailored fit for every activity.

HYDROGUARD SURFACE SHIELD

Stay warm and comfortable in the harshest winter conditions. Our fabric features a water-resistant surface, keeping you dry and protected even in light precipitation.

COOLING TOWEL

Refresh while on the go with the SParms Cooling Towel. With its advance COOLTECH weave, this towel provides instant relief—simply wet, wring, and flick to activate. It's designed to fight against the heat no matter where you are and what you do.

HOW IT WORKS

Wet your SParms Cooltech Cooling Towel with water and wring out any excess.

Flick it in the air to activate the cooling weave.

Place it around your neck or any area that needs relief.

If it warms up, simply repeat steps 1 and 2 to reactivate its effect.
