

COOLING TOWEL

Refresh while on the go with the SParms Cooling Towel. With its advance COOLTECH weave, this towel provides instant relief—simply wet, wring, and flick to activate. It's designed to fight against the heat no matter where you are and what you do.

HOW IT WORKS

Wet your SParms Cooltech Cooling Towel with water and wring out any excess.

Flick it in the air to activate the cooling weave.

Place it around your neck or any area that needs relief.

If it warms up, simply repeat steps 1 and 2 to reactivate its effect.
