**Letter of Ownership:**

ITactical Solutions, LLC is a small veteran-owned business dedicated to delivering cutting-edge IT infrastructure, cloud, and cybersecurity services to federal and state government agencies. Established with a mission to bring operational excellence and technical superiority to government operations, the company thrives on innovation, integrity, and proven military discipline.

**Ownership Background:**

ITactical Solutions is proudly owned and operated by Mr. Adolphus "Trey" Foreman III, a highly experienced IT professional and disabled U.S. Army veteran with over two decades of service in both military and civilian sectors. Adolphus brings unmatched leadership, enterprise-level technical expertise, and a proven record of securing and optimizing complex IT environments within the Department of Defense (DoD) and other federal agencies.

**Experience and Technical Capability:**

Adolphus Foreman has consistently demonstrated high-impact results in leadership roles ranging from Senior Lead Microsoft Engineer to Cloud Operations Team Lead for critical DoD infrastructures. His accomplishments include:

- Leading multidisciplinary teams supporting over 1,800 servers and 195 domain controllers.
- Spearheading Oracle-to-SQL Server database migrations and AWS infrastructure modernization efforts.
- Implementing secure, compliant cloud solutions using AWS, VMware, RedHat Linux, and Windows platforms.
- Achieving and maintaining STIG/IAVA compliance across classified and unclassified domains.
- Managing full lifecycle enterprise backup solutions using Cohesity, Veeam, and Tivoli Storage Manager.

With a deep understanding of government security mandates and cloud compliance requirements, Trey has built and led technical teams that align IT infrastructure with mission-critical objectives and regulatory expectations.

**Certifications & Education:**

Mr. Foreman holds several high-level IT certifications, including:

- AWS Certified Solutions Architect – Professional
- MCSE (Multiple Specializations: Core Infrastructure, Cloud Platform, SharePoint, Server Infrastructure)
- COMPTIA Security+ CE
- ITIL Foundation Certification

He continues to advance his technical education through Central Texas College in pursuit of an A.A.S. in Network Administration.

**Veteran Leadership and Vision:**

As a disabled U.S. Army veteran, Adolphus's leadership philosophy is founded on duty, accountability, and operational excellence. His military training and command experience instilled a structured, results-driven approach to technical management, risk mitigation, and project delivery. ITactical Solutions reflects these values in every contract executed, ensuring reliable and secure outcomes for government partners.

**Conclusion:**

Under Adolphus Foreman's leadership, ITactical Solutions, LLC combines military precision with modern innovation. As a mission-ready and security-focused IT services provider, the company is strategically positioned to serve as a valuable Prime or Subcontractor on federal initiatives across cybersecurity, cloud transformation, systems engineering, and data operations.
