Mission-Driven | Solution-Focused – About Us 2025.

At ITactical Solutions, we deliver high-impact IT engineering and cybersecurity services to support mission-critical systems for federal agencies and defense organizations. As a veteran-owned small business (VOSB), we bring decades of combined experience across enterprise infrastructure, cloud migration, cybersecurity compliance, and systems modernization.

Founded by seasoned professionals with deep roots in DoD operations and enterprise IT environments, our leadership team brings unmatched technical depth and operational expertise. From Active Directory redesign and cloud-first infrastructure to STIG/IAVA compliance, NIPR/SIPR network administration, and AWS architecture, we build, secure, and support systems that must work—every time.

Our principals, Adolphus Foreman III and Matt Jendrzejczak, have led major government IT initiatives worldwide. Together, they bring over 35 years of hands-on experience supporting Army, AFCENT, and USMEPCOM environments. They've led Windows Server modernization efforts for over 1,800 servers, managed cloud transformations in hybrid AWS environments, and enforced STIG compliance across multiple data centers. With backgrounds that include VMware vSphere/Nutanix administration, MECM/SCCM patch management, SQL/Oracle migration, and high-side encryption equipment like TACLANEs and KIV-7s, ITactical Solutions is equipped to solve complex challenges with precision and efficiency.

What We Stand For:

· **Security-First Engineering** – We harden environments against the most demanding   compliance frameworks including STIG, ACAS, and DoD IAVA policies.

· **Operational Readiness** – Our work is aligned to mission-critical uptime, resilience, and long-term scalability.

· **Veteran Values** – Discipline, leadership, and teamwork are at the core of everything we deliver.

· **Real-World Results** – We've operated on the ground—Baghdad, Afghanistan, Qatar, and stateside—ensuring infrastructure uptime under pressure.

Whether you're seeking a subcontracting partner or a prime vendor capable of standing up secure infrastructure fast, ITactical Solutions is ready to engage.
