

Capital Medical Resources is a consolidated sourcing specialist for all of your surgical and endoscopic equipment needs!

Sourcing equipment can be a challenge. Incorrect or missing catalog numbers, discontinued items, defunct suppliers, and most importantly, finding equipment within “budget”, can make the procurement process a time consuming and tedious job. Why not lean on the knowledge and expertise of the team at Capital Medical Resources to do the work for you? We can utilize our 64-years + of industry experience, and our comprehensive global partner network, to get you the equipment you want, at a price that meets your budget. Let us go to work for you!

OUR APPROACH

We **Listen** to our customers, as they describe their needs.

We **Identify** options that will best address those needs.

We **Propose** effective solutions.

We **Support** our customers with excellent customer service through the equipment life-cycle.

RESEARCH + SOURCE SERVICE + RECYCLE

Make Capital Medical Resources your FIRST call when you have procurement needs. Our experts can help with the entire life-cycle process, from acquisition, to service, and end-of-life recycling. Put us to the test and call us today!

- * Consignment

Buy | Sell | Trade | Consign

When it's time to upgrade or part with equipment you are no longer using, contact Capital Medical Resources! Together we can explore options to get rid of your usable, but unwanted equipment, while freeing up cash and valuable storage space. Also, when upgrading to new technology, call Capital Medical Resources before accepting the OEM's trade-in, as we can often provide a higher trade-in value, leading to be a better cost offset in your budget.

Some items may be better suited for consignment, especially older equipment, or soon to be out-of-date disposables. We have a vast network of global suppliers and customers, and will work to facilitate the sale of your items.

All brands and registered trademarks are owned by their respective companies.
