

ROBOTIC SCOPE REPAIR & EXCHANGE

Save significant money on your robotic scope repairs with Capital Medical Resources! Contact us for a no-cost, no-obligation estimate, or to learn more about robotic services.

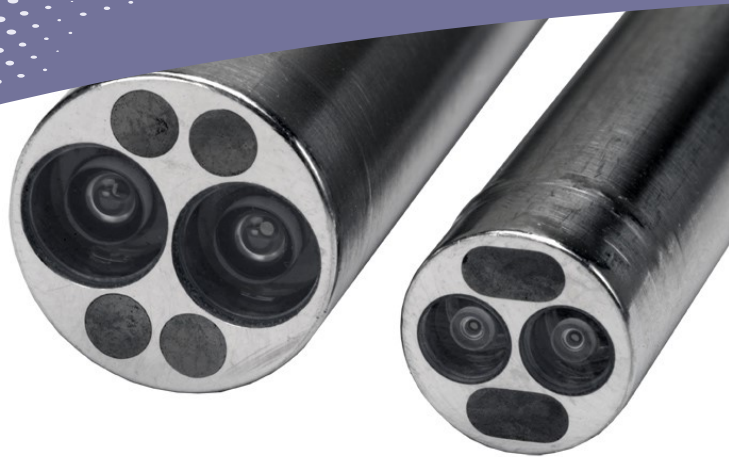

Robotic surgical systems are one of the medical industries most exciting and growing new technologies. As with other types of medical devices, the specialized scopes and instruments used in the robotic systems can fail or become damaged. These repairs often carry a premium price tag with manufacturer repairs often reaching \$8,000.00—\$12,000.00 per scope! Capital Medical Resources offers a robust scope repair program that can save 50% or more over manufacturer prices while maintaining the highest quality of repair, with exceptional warranties to back it up! For added convenience, we also offer an exchange option with a quick 24-48 hr. turnaround. To learn more, please contact us.

SAVINGS + QUALITY YOU CAN TRUST
