

# GEM e6

Exceptionally engineered for moving people, the GEM e6 is a six-passenger EV in a class of its own designed for individuals, cities, campuses and communities.

GEM is federally classified as a low-speed vehicle (LSV). An LSV is a street-legal vehicle with a top speed of 25 mph and gross vehicle weight of less than 3,000 lbs. Its low speeds and standard safety features promote a safer environment for vehicles and pedestrians to coexist. GEM LSVs help solve critical transportation challenges cities and organizations are facing with pollution, safety and accessibility. Experience exceptional when you drive GEM.
