Hello, Nice to Meet You!

Hi, I'm Makeba T.M Hopkins, a conceptual artist and graphic designer with a passion for creating visually appealing designs that communicate a message effectively. I have over twenty-two years experience working in Information Technology. Over the past 7 years I have honed my skills through online training and experience working as a freelance graphic designer and conceptual artist.

I believe that good design is about solving problems and finding creative solutions. My design process always starts with understanding the needs of the client and the message they want to convey. I then use my expertise in creative digital design, communication skills and computer skills to create designs that are not only aesthetically pleasing, but also effective in communicating the intended message.
