maintenance services

YOUR SOURCE FOR EV FLEET CHARGING

Design - Build - Maintain

LivComm specializes in turnkey vehicle charging solutions tailored to each client's needs and goals. We design, build, and maintain EV charging equipment for all commercial applications, coordinating every step required along the way, including permitting and zoning approval. We have the knowledge, experience, and partnerships required to offer a complete range of resources for projects of all sizes.

VIABILITY AND BUDGET

Integrating electric vehicle (EV) charging stations offers significant advantages for commercial properties. Retail centers can benefit from increased customer dwell time, which can drive sales, while property managers can attract a broader range of environmentally conscious tenants. LivComm partners with commercial clients to manage and optimize their EV charging infrastructure, providing tailored support at every stage of the project.

If you're considering adding EV charging stations to your facilities, LivComm's expert team is ready to assist. We provide customized solutions, ensuring your project is managed seamlessly from planning and installation to ongoing maintenance and support.

CONSTRUCTION AND INSTALLATION

Once your project details are finalized, it's time to move into the construction phase. This process may include tasks such as utility markouts, service upgrades, directional drilling, sawcutting, concrete work, electrical installations, building modifications, landscaping, signage, and asphalt or striping. Leveraging our strong partnerships with contractors and EV equipment manufacturers nationwide, we ensure a smooth and efficient construction process. Our team expertly coordinates all aspects of the installation, managing every detail to deliver a seamless electric vehicle charging infrastructure project.

KEEPING YOUR FLEET OPERATIONAL AND YOUR CHARGING STATION FUNK

Our job doesn't stop once your equipment is installed. Ensuring that your electric vehicle charging stations remain fully operational is crucial, so we offer comprehensive maintenance and service plans to keep your equipment in top condition. We also conduct annual inspections to guarantee that your charging stations are safe and functioning properly, providing continuous reliability and peace of mind.
