

PANEL LIMITATIONS

Seattle Panel Limitations						
Louvre Size	Width Size				Height Size	
	Minimum Size	Maximum Size				
		Single Panel	Bi-fold Panels	Multi-fold (3-4)	Minimum Size	Maximum Size
63mm	200mm	750mm	600mm Per Panel	Not Available in Seattle	250mm	3000mm
76mm						
89mm						

Montana Panel Limitations						
Louvre Size	Width Size				Height Size	
	Minimum Size	Maximum Size				
		Single Panel	Bi-fold Panels	Multi-fold (3-4)	Minimum Size	Maximum Size
63mm	200mm	750mm	650mm Per Panel	550mm Per Panel	250mm	3000mm
76mm		850mm				
89mm		950mm				

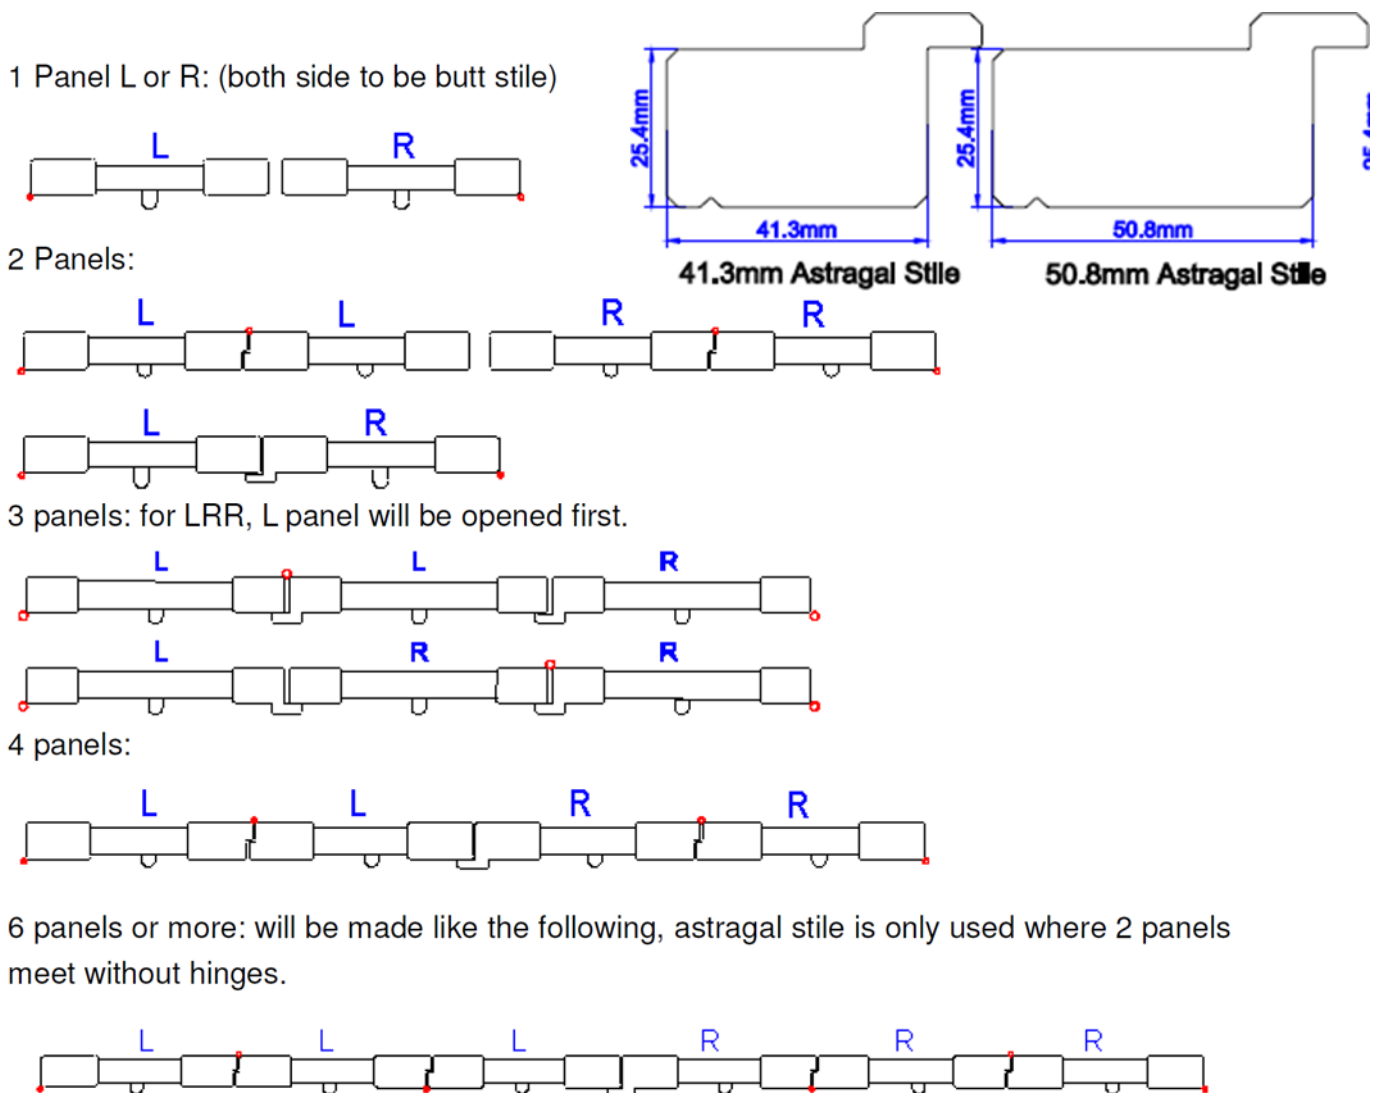

Hollywood Panel Limitations						
Louvre Size	Width Size				Height Size	
	Minimum Size	Maximum Size				
		Single Panel	Bi-fold Panels	Multi-fold (3-4)	Minimum Size	Maximum Size
63mm	200mm	750mm	600mm Per Panel	Not Available in Hollywood	250mm	3000mm
76mm		850mm				
89mm						

PANEL STILES AND CONFIGURATIONS

Seattle & Montana is manufactured with a 50.8mm stile | **Hollywood** is manufactured with a 50.8mm stile

All single panel shutters or same direction bi-folding shutters will be manufactured with a standard butt stile. Any shutter with panels which meet without hinges will have an astragal stile.

Please see diagrams below for examples

Please specify the panel fold configuration on order form, we will pre-hinge according to it.

If you require any other configuration not shown please contact Louvre Bespoke.			
*** Please note Multi-Fold is ONLY available in our Montana Range ***			

RAIL SIZES & LOCATIONS

The minimum size of both the top & bottom rail size for panels is 80mm. This size will vary due to louvre size selection and the shutter height to allow for maximum amount of louvres.

The factory will decide on the optimum rail sizes for the shutter panels. If no mid-rail and/or split is used the top & bottom rail will be the same size. Mid-rails dimensions are 76mm

RAIL SIZES & LOCATIONS

CONTINUED...

Mid-rail and/or split locations can vary in position from given height due the louvre size selection and overall shutter height

63mm louvre mid rail/split location can vary be +/- 25mm.

76mm louvre mid rail/split location can vary be +/- 31mm

89mm louvre mid rail/split location can vary be +/- 38mm

*** Please note we would advise any shutter over 1450mm should have either a mid-rail/louvre split ***

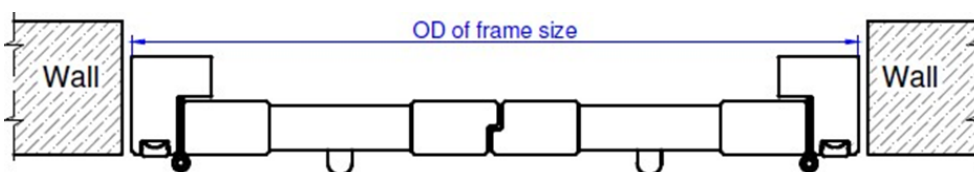

*** Please note any shutter with an overall height over 1800mm MUST have a mid-rail ***

OD (Overall Dimension of Frame Size)

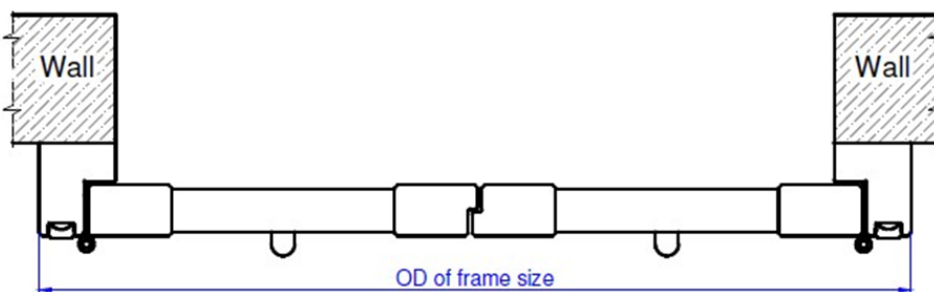

The overall dimension of the shutters. The width is the outer left frame edge to the outer right frame edge. The height is the bottom of frame to the top of the frame.

*** please note that with the INSIDE MOUNT Z FRAME the overall dimension is from the back of the frame and does not include the outer 'lip' of the frame ***

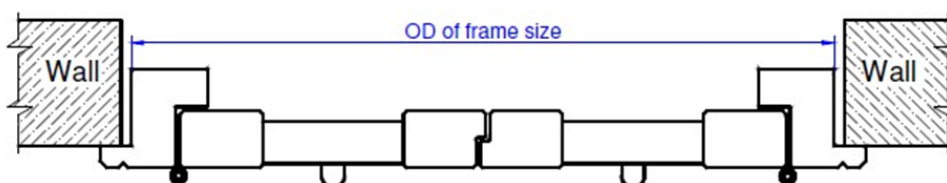

*** Please note that the overall size can vary by 1.6mm for the height and 1.6mm for the width ***

INSIDE MOUNT
PLAIN L FRAME

OUTSIDE MOUNT
VINTAGE L FRAME

INSIDE MOUNT
BULLNOSE Z-FRAME
