

IPHONE

Download Your Apps

- AVR X (free) or AVR X PRO (\$5 one time)
- Nota Player

1. Open AVR X or AVR X Pro
2. Open Settings on bottom right
3. Change file format to MP3
4. Click back arrow to go to main screen
5. Click red button in middle of screen to start recording your story
6. After you are done click red record button again and then stop button to the right to end the recording
7. A window will come up to name it, do that, then click save
8. Go to file box on bottom left
9. Click default folder and find the recording you just made (it should be the first one)
10. Click the box to the right with the up arrow
11. Choose share
12. Scroll down to Save to files
13. Notice the place it opens up to, you'll see mine opened to my icloud drive
14. Click new folder & name that folder whatever you want
15. Click save, and it'll bring you back to the AVR X app
16. Exit that app
17. Open Nota Player App
18. Click import media button
19. Click New folder & name this folder whatever you'd like
20. Click create
21. Click plus button
22. Click import files
23. Find the folder you made in files, mine was called Lalala
24. Open that folder and select your file inside
25. Click open in top right
26. Now your new story should be in the Nota player
27. You can add more stories
