

Top 100 Questions

Living and Non-Living Things

Here are the **Top 100 Questions on Living and Non-Living Things**, suitable for school-level science learning. They are grouped into categories for clarity.

♦ Basic Conceptual Questions

1. What are living things?
 2. What are non-living things?
 3. What are the main characteristics of living things?
 4. How do we differentiate between living and non-living things?
 5. Are plants living things? Why?
 6. Can non-living things move? Explain with examples.
 7. Do living things grow? How?
 8. Do non-living things grow? Explain.
 9. What is reproduction in living organisms?
 10. Can non-living things reproduce?
-

♦ Living Things Characteristics

11. Name 5 characteristics of living things.

12. Why is breathing important for living organisms?
 13. How do animals respond to stimuli?
 14. Do all living things need food? Why?
 15. How do plants make their own food?
 16. What is photosynthesis?
 17. What is respiration in living things?
 18. How do living things excrete waste?
 19. What does movement mean in living organisms?
 20. What is the difference between internal and external movement?
-

♦ **Non-Living Things Characteristics**

21. Do non-living things breathe?
 22. Can non-living things feel or respond?
 23. Give examples of man-made non-living things.
 24. Give examples of natural non-living things.
 25. Why doesn't a rock grow?
 26. Do non-living things die?
 27. Can non-living things reproduce?
 28. How are non-living things useful to us?
 29. Do non-living things require energy?
 30. What are the sources of non-living things?
-

♦ **Examples and Comparison**

31. Give 5 examples each of living and non-living things.
 32. Is a robot a living thing? Why or why not?
 33. Is fire a living thing? Explain.
 34. Is water living or non-living?
 35. Compare the movement of a car and a bird.
 36. How is a tree different from a chair?
 37. What makes a pet animal different from a stuffed toy?
 38. Why is the sun considered non-living?
 39. Can a non-living thing become a living thing?
 40. Can something be both living and non-living?
-

♦ **Special Cases & Exceptions**

41. Is virus a living or non-living thing?
42. Are seeds living or non-living?
43. Are fossils considered living things?
44. Are dead organisms considered living?
45. Is a cloud a living thing?
46. Are computer programs or AI living things?
47. Why do we not consider air a living thing?
48. Is a clock a living or non-living thing?

49. Is a mushroom living?

50. Why is a balloon not living even though it moves?

♦ **Growth and Development**

51. How do humans grow?

52. How do animals grow?

53. How do plants show growth?

54. Can non-living things show apparent growth?

55. How do living things repair themselves?

56. What are the stages of growth in humans?

57. Do all living things grow at the same rate?

58. What is development in living things?

59. What factors affect the growth of living things?

60. Can growth happen without food?

♦ **Reproduction and Life Cycle**

61. What is a life cycle?

62. Describe the life cycle of a butterfly.

63. Describe the life cycle of a frog.

64. How do plants reproduce?

65. Why is reproduction important?

66. What is the difference between asexual and sexual reproduction?
67. Do all living organisms lay eggs?
68. Can plants reproduce without seeds?
69. How does reproduction occur in unicellular organisms?
70. Why don't non-living things have a life cycle?
-

♦ **Movement and Response**

71. How do humans move?
72. How do birds fly?
73. How do fish swim?
74. Do plants move? Explain with examples.
75. What is tropism in plants?
76. What is stimuli?
77. How do animals respond to danger?
78. What is the role of the brain in response?
79. Do non-living things respond to heat or touch?
80. How does a sunflower follow sunlight?
-

♦ **Environmental Interaction**

81. How do living things depend on the environment?
82. What are biotic and abiotic components?

83. What is an ecosystem?
 84. How do living and non-living things interact?
 85. What role do non-living things play in nature?
 86. How do animals adapt to their environment?
 87. What happens when living things die?
 88. Why is water important for living things?
 89. Can a non-living environment support life?
 90. How do living things maintain balance in nature?
-

♦ **Fun and Thought-Provoking Questions**

91. Can a robot ever be considered alive?
 92. Why do we need to study both living and non-living things?
 93. Can scientists create life from non-living matter?
 94. What would happen if there were only non-living things on Earth?
 95. How do astronauts identify living organisms in space?
 96. Can sound be considered a living thing?
 97. Why do we call Earth a "living planet"?
 98. Can AI develop life-like behavior?
 99. What is the most important difference between living and non-living things?
 100. How would life be without non-living things?
-

The World of Plants

Here are the **Top 100 Questions on the World of Plants**, designed for school students, competitive exams, and general science learning. These are categorized for easy navigation.

I. Introduction to Plants

1. What are plants?
 2. Why are plants important for life on Earth?
 3. What are the main parts of a plant?
 4. What is the function of roots in a plant?
 5. What does the stem do in a plant?
 6. What is the function of leaves?
 7. What are flowers used for in plants?
 8. What are seeds?
 9. How do plants grow?
 10. What do plants need to grow?
-

II. Photosynthesis and Plant Nutrition

11. What is photosynthesis?
12. Which part of the plant carries out photosynthesis?
13. What is chlorophyll?
14. Why are leaves green?

15. What are the raw materials needed for photosynthesis?
 16. What is the role of sunlight in photosynthesis?
 17. How do plants absorb water?
 18. What are stomata?
 19. How do plants make their own food?
 20. Why are plants called autotrophs?
-

III. Types of Plants

21. What are herbs, shrubs, and trees?
 22. What are creepers and climbers?
 23. What is the difference between monocots and dicots?
 24. What are flowering and non-flowering plants?
 25. What are aquatic plants?
 26. What are terrestrial plants?
 27. What are desert plants?
 28. What are insectivorous plants?
 29. Name some parasitic plants.
 30. What are epiphytes?
-

IV. Parts of a Plant (Detailed)

31. What are the different types of roots?

32. What is the difference between tap root and fibrous root?
 33. What is the function of root hairs?
 34. What is xylem and phloem?
 35. What are nodes and internodes?
 36. What are simple and compound leaves?
 37. What is the venation in leaves?
 38. What are the parts of a flower?
 39. What are sepals, petals, stamens, and carpels?
 40. What is a fruit?
-

V. Reproduction in Plants

41. What is pollination?
 42. What are the types of pollination?
 43. What is fertilization in plants?
 44. What is seed formation?
 45. What is seed dispersal?
 46. How do seeds germinate?
 47. What is vegetative propagation?
 48. Name plants that grow from roots, stems, and leaves.
 49. What is grafting?
 50. What are spores?
-

VI. Plant Habitat and Adaptation

51. How do plants adapt to deserts?
 52. How do aquatic plants survive in water?
 53. What is adaptation in plants?
 54. How do mountain plants differ from plains plants?
 55. What are xerophytes and hydrophytes?
 56. How do plants survive in cold climates?
 57. How do mangrove plants grow in salty water?
 58. Why do desert plants have thorns?
 59. What is the function of waxy coatings on leaves?
 60. Why are rainforest plants broad-leaved?
-

VII. Water and Transport in Plants

61. What is transpiration?
62. What are the factors affecting transpiration?
63. How is water transported in plants?
64. What is the role of root pressure?
65. What is capillary action in plants?
66. What is the function of stomata in transpiration?
67. How do minerals reach the leaves?
68. What is ascent of sap?

69. How does transpiration help in cooling the plant?

70. What is wilting?

VIII. Economic Importance of Plants

71. How do plants help in providing food?

72. What are medicinal plants?

73. What are cash crops?

74. What plants are used to make clothes?

75. What is the importance of wood?

76. How do plants provide oxygen?

77. What are spices? Name a few.

78. How do plants help in soil conservation?

79. What are oil-yielding plants?

80. What are fiber-yielding plants?

IX. Plants and Environment

81. How do plants help reduce pollution?

82. What is afforestation?

83. What is deforestation?

84. How does deforestation affect climate?

85. What is the role of trees in rain?

86. How do plants prevent soil erosion?
 87. How do plants support biodiversity?
 88. What is carbon dioxide-oxygen balance?
 89. How do forests act as carbon sinks?
 90. How do plants purify air?
-

X. Interesting and Unique Facts

91. What is the world's tallest tree?
 92. Which plant grows the fastest?
 93. What is the smallest flowering plant?
 94. Which plant has the largest flower?
 95. Which plant lives the longest?
 96. What is a bonsai?
 97. What is a carnivorous plant?
 98. What is a saprophytic plant?
 99. Which plant is called the "touch-me-not"?
 100. What makes the banyan tree special?
-

Food from Plants

Here are the **Top 100 Questions on Food from Plants**, categorized for easy learning. These questions are useful for school students, competitive exams, and general science knowledge.

I. Basics of Food from Plants

1. What is food from plants?
 2. Why do we get food from plants?
 3. Name the main parts of plants that are used as food.
 4. What are edible parts of a plant?
 5. Which part of the plant is most commonly eaten?
 6. What are cereals?
 7. What are pulses?
 8. What are oilseeds?
 9. What are fruits?
 10. What are vegetables?
-

II. Fruits and Edible Parts

11. Name 5 fruits that we eat.
12. Which fruits grow on trees?
13. Which fruits grow on creepers?

14. What are seedless fruits? Give examples.
 15. What is the edible part of a mango?
 16. What is the edible part of a banana?
 17. What part of the plant is a tomato?
 18. Are all fruits sweet? Explain.
 19. What are dry fruits? Name a few.
 20. What nutrients are obtained from fruits?
-

III. Vegetables and Their Parts

21. Name the vegetables that are roots.
 22. Name vegetables that are stems.
 23. Name vegetables that are leaves.
 24. Name vegetables that are flowers.
 25. Which vegetables grow underground?
 26. Is a potato a root or stem?
 27. What part of the onion do we eat?
 28. Is a carrot a root or stem?
 29. What is the edible part of cauliflower?
 30. Why are green leafy vegetables important?
-

IV. Grains and Seeds

31. What are grains?
 32. Name 5 common grains we eat.
 33. What is the source of wheat?
 34. From which plant do we get rice?
 35. What are millets?
 36. What are pulses? Give examples.
 37. What is the difference between cereals and pulses?
 38. What plant gives us maize?
 39. What are legumes?
 40. What is germination of seeds?
-

V. Oil and Fat Sources

41. What are oilseeds?
42. Name plants that give us oil.
43. How is oil extracted from seeds?
44. Which oil is obtained from mustard?
45. From which plant do we get groundnut oil?
46. What are the uses of coconut oil?
47. What plant gives us olive oil?
48. What is sunflower oil made from?
49. What are healthy plant-based fats?

50. What are the benefits of plant oils?

VI. Beverages from Plants

51. From which plant is tea obtained?

52. What plant gives us coffee?

53. Which plant part is used for making tea?

54. What plant part is used in coffee?

55. What are herbal teas made from?

56. What plant gives us cocoa?

57. What is sugarcane used for?

58. How do we get sugar from plants?

59. What are plant-based drinks?

60. What is coconut water?

VII. Spices and Condiments

61. Name 5 spices obtained from plants.

62. From which plant do we get black pepper?

63. What is the source of turmeric?

64. Which part of the plant is used for cardamom?

65. From where do we get cloves?

66. What is cinnamon? From which plant part?

67. What is the source of cumin seeds?

68. What are herbs and spices?

69. What are condiments?

70. Why are spices used in food?

VIII. Nutrients from Plants

71. What nutrients do we get from fruits?

72. What nutrients are present in vegetables?

73. What do cereals provide to our body?

74. What nutrients are in pulses?

75. What vitamins are present in leafy vegetables?

76. Why is fiber important?

77. Which plant foods are rich in protein?

78. Name plant foods rich in carbohydrates.

79. What are antioxidants in plant foods?

80. Why are plant foods considered healthy?

IX. Medicinal and Edible Plants

81. What are medicinal plants?

82. Name 5 plants used for medicine and food.

83. What are edible herbs?

84. What is aloe vera used for?
 85. What is the use of tulsi (holy basil)?
 86. Can all plants be eaten?
 87. What is a kitchen garden?
 88. What are wild edible plants?
 89. What are plant-based superfoods?
 90. Why are organic plants better?
-

X. Fun Facts and General Knowledge

91. Which plant gives both fruit and oil?
 92. Which plant gives us jaggery?
 93. What is a plant-based diet?
 94. Which country eats the most rice?
 95. What plant is used to make tofu?
 96. From which plant do we get vanilla?
 97. Which plant part is eaten as sugar beet?
 98. What is the national fruit of India?
 99. Can we eat all flowers?
 100. How do we preserve food from plants?
-

Let me know if you'd like these questions:

- For a specific **grade level** or **curriculum**

I can also create **PDFs** or **printable sheets** if needed.

The World of Animals

Here are the **Top 100 Questions on the World of Animals**, grouped into important categories. These questions are ideal for school students, quizzes, general knowledge, and science education.

I. Introduction to Animals

1. What are animals?
 2. How are animals different from plants?
 3. What are the characteristics of animals?
 4. Why do animals move?
 5. Do all animals have a backbone?
 6. What is the importance of animals in our ecosystem?
 7. How do animals obtain food?
 8. What are herbivores, carnivores, and omnivores?
 9. What are domestic animals?
 10. What are wild animals?
-

II. Animal Classification

11. How are animals classified?
 12. What are vertebrates?
 13. What are invertebrates?
 14. What are mammals?
 15. What are reptiles?
 16. What are amphibians?
 17. What are birds?
 18. What are fish?
 19. Give examples of cold-blooded animals.
 20. What are warm-blooded animals?
-

III. Body Structure and Adaptation

21. What is an exoskeleton?
22. What is the function of the skeleton in animals?
23. How do animals adapt to their environment?
24. What are aquatic animals?
25. What are terrestrial animals?
26. What are arboreal animals?
27. What are aerial animals?
28. What is camouflage in animals?

29. What are body coverings of animals?

30. Why do polar bears have thick fur?

IV. Movement and Locomotion

31. How do animals move?

32. Which animals crawl?

33. Which animals fly?

34. Which animals swim?

35. Which animals jump or hop?

36. How do snakes move without legs?

37. How do birds fly?

38. How do fish swim?

39. What is migration in animals?

40. Why do animals migrate?

V. Senses and Behavior

41. How do animals sense their surroundings?

42. Which animal has the sharpest eyesight?

43. How do bats navigate in the dark?

44. Which animal can smell the best?

45. What is hibernation?

- 46. What is estivation?
 - 47. What is nocturnal behavior?
 - 48. Name some nocturnal animals.
 - 49. How do animals communicate?
 - 50. What are instincts?
-

VI. Reproduction in Animals

- 51. How do animals reproduce?
 - 52. What is oviparous reproduction?
 - 53. What is viviparous reproduction?
 - 54. Which animals lay eggs?
 - 55. Which animals give birth to young ones?
 - 56. How do birds hatch their eggs?
 - 57. What is metamorphosis in animals?
 - 58. Describe the life cycle of a butterfly.
 - 59. Describe the life cycle of a frog.
 - 60. How do fish reproduce?
-

VII. Food and Eating Habits

- 61. What do herbivores eat?
- 62. What do carnivores eat?

- 63. What do omnivores eat?
 - 64. What are scavengers?
 - 65. What are decomposers?
 - 66. How do animals hunt their prey?
 - 67. What is the role of teeth in food habits?
 - 68. Which animal has the strongest bite?
 - 69. Why do cows chew cud?
 - 70. What are ruminants?
-

VIII. Animal Homes and Habitats

- 71. What is a habitat?
 - 72. Where do lions live?
 - 73. Where do polar bears live?
 - 74. Where do camels live?
 - 75. What is a burrow?
 - 76. What is a nest?
 - 77. Which animals live in water?
 - 78. Which animals live underground?
 - 79. What is a den?
 - 80. What is a hive?
-

IX. Endangered and Extinct Animals

81. What is an endangered animal?
 82. What is extinction?
 83. Name some endangered animals.
 84. What causes extinction of animals?
 85. How can we protect endangered animals?
 86. What is wildlife conservation?
 87. What is a wildlife sanctuary?
 88. What is a national park?
 89. What is poaching?
 90. What are protected species?
-

X. Domestic and Pet Animals

91. What are pet animals?
92. Name common pet animals.
93. What is the use of domestic animals?
94. How do cows help humans?
95. What is the importance of dogs?
96. What do we get from hens?
97. What are draught animals?
98. What do we get from sheep?

99. What is the role of animals in farming?

100. How can we care for animals?

Let me know if you'd like:

- **Answers** to these questions
- A **printable worksheet or quiz format**
- A version in **MCQ (Multiple Choice Questions)** format
- Translations in **Hindi or other languages**

I'd be happy to assist further!

Food and Shelter for Animals

Here are the **Top 100 Questions on Food and Shelter for Animals**, categorized for easier understanding. These questions are excellent for school students, quizzes, science projects, and general knowledge enrichment.

I. Introduction to Animal Food and Shelter

1. What is meant by food and shelter for animals?
2. Why do animals need food?
3. Why do animals need shelter?
4. What are the basic needs of animals?
5. How do animals find food?
6. What types of shelters do animals use?
7. What are natural shelters?

8. What are artificial shelters?
 9. How do shelters protect animals?
 10. What happens if animals don't find food or shelter?
-

II. Types of Animal Food

11. What are herbivores?
 12. What are carnivores?
 13. What are omnivores?
 14. What do scavengers eat?
 15. What are decomposers?
 16. Give 5 examples of herbivorous animals.
 17. Give 5 examples of carnivorous animals.
 18. Give 5 examples of omnivorous animals.
 19. What do aquatic animals eat?
 20. What do birds eat?
-

III. Eating Habits and Adaptations

21. How do different animals eat different foods?
22. What are feeding habits?
23. Why do cows have flat teeth?
24. Why do lions have sharp teeth?

25. Why do snakes swallow their prey whole?
 26. What are ruminants?
 27. What is cud-chewing?
 28. Why do frogs have sticky tongues?
 29. What is the use of a beak in birds?
 30. How do insects like mosquitoes feed?
-

IV. Types of Animal Shelters

31. What is a den?
 32. What is a burrow?
 33. What is a nest?
 34. What is a hive?
 35. What is a lair?
 36. What is a cave?
 37. What is a hole?
 38. What is a web (used as shelter)?
 39. What is a coop?
 40. What is a stable?
-

V. Animals and Their Homes

41. Where does a lion live?

42. Where does a rabbit live?

43. Where does a bird live?

44. Where does a bear live?

45. Where does a spider live?

46. Where does a bee live?

47. Where does a snake live?

48. Where does a dog live?

49. Where does a fish live?

50. Where does a camel live?

VI. Natural vs. Man-made Shelters

51. What are natural animal shelters?

52. Give examples of natural shelters.

53. What are man-made animal shelters?

54. Name animals kept in man-made shelters.

55. What is a kennel used for?

56. What is a shed used for?

57. What is a poultry farm?

58. What is a zoo?

59. How are man-made shelters different from natural ones?

60. Why are stables built for horses?

VII. Animal Habitat and Shelter Adaptation

61. What is a habitat?
 62. What is a forest habitat?
 63. What is a desert habitat?
 64. What is an aquatic habitat?
 65. How do animals build their shelters?
 66. How do animals adapt to cold habitats?
 67. How do animals adapt to hot habitats?
 68. How do birds build nests?
 69. How do ants build anthills?
 70. How do termites make mounds?
-

VIII. Sources of Animal Food

71. From where do animals get their food?
72. What is grazing?
73. How do carnivores catch their prey?
74. What is scavenging?
75. What is hunting in animals?
76. How do domestic animals get food?
77. How do animals store food?
78. Which animals eat fruits and seeds?

79. Which animals eat insects?

80. Which animals feed on blood?

IX. Special Behaviors Related to Food and Shelter

81. What is migration?

82. Why do birds migrate?

83. What is hibernation?

84. What is estivation?

85. How do squirrels store food?

86. How do ants store food?

87. How do bees make honey?

88. How do beavers build dams?

89. What is territorial behavior in animals?

90. Why do some animals live in groups?

X. Humans and Animal Food/Shelter

91. How do humans provide food for animals?

92. How do farmers feed livestock?

93. What is fodder?

94. What do pets eat?

95. What do zookeepers feed animals?

96. Why do people build shelters for animals?
 97. What is animal husbandry?
 98. What are feeding troughs?
 99. Why is it important to care for animal homes?
 100. How can we protect animals' natural shelters?
-

Let me know if you'd like:

- **Answers** to each question
- **Worksheets or quizzes** based on these questions
- A **PDF or printable format**
- Translations in **Hindi or other languages**

Happy to help further!

My Body

Here are the **Top 100 Questions on "My Body"**, categorized for clarity. These are ideal for school-level learning, science projects, quizzes, and general knowledge.

I. Introduction to the Human Body

1. What is the human body?
2. How many parts does the human body have?
3. What are the five main senses of the human body?
4. What are the external parts of the body?

5. What are internal organs?
 6. What is the function of the skin?
 7. How does the body grow?
 8. How many bones are in the human body?
 9. What is a joint?
 10. What is the skeleton?
-

II. Organs and Their Functions

11. What are organs?
 12. What is the function of the brain?
 13. What is the heart?
 14. What does the heart do?
 15. What are lungs?
 16. What do the lungs do?
 17. What is the function of the stomach?
 18. What is the liver?
 19. What do the kidneys do?
 20. What is the role of the intestines?
-

III. Bones and Muscles

21. How many muscles are there in the body?

22. What is the function of muscles?
 23. How do bones help the body?
 24. What are joints?
 25. What is the backbone?
 26. What is the skull?
 27. How do muscles and bones work together?
 28. What are voluntary muscles?
 29. What are involuntary muscles?
 30. What is cartilage?
-

IV. The Five Sense Organs

31. What are the five sense organs?
 32. What is the function of the eyes?
 33. What helps us see in the dark?
 34. What is the function of ears?
 35. What are the parts of the ear?
 36. How does the nose help us?
 37. What is the tongue used for?
 38. What are taste buds?
 39. What are the four basic tastes?
 40. What is the role of skin?
-

V. Circulatory and Respiratory Systems

41. What is the circulatory system?
 42. What does blood do?
 43. What are blood vessels?
 44. What is the function of the heart?
 45. What is a heartbeat?
 46. What is the respiratory system?
 47. What is breathing?
 48. How do lungs work?
 49. What is oxygen used for in the body?
 50. What happens when we inhale and exhale?
-

VI. Digestive and Excretory Systems

51. What is the digestive system?
52. What is digestion?
53. What happens in the stomach?
54. What is the function of the small intestine?
55. What does the large intestine do?
56. What is the function of the liver in digestion?
57. What is the excretory system?
58. How do the kidneys help remove waste?

59. What is urine?

60. What happens if waste is not removed from the body?

VII. Nervous System

61. What is the nervous system?

62. What is the function of the brain?

63. What are nerves?

64. What is the spinal cord?

65. How do we feel pain?

66. How does the brain send messages?

67. What is reflex action?

68. What is memory?

69. How do we learn things?

70. What helps us think and reason?

VIII. Health and Hygiene

71. Why is it important to keep the body clean?

72. How often should we bathe?

73. Why should we brush our teeth twice a day?

74. Why should we wash our hands before eating?

75. What are germs?

- 76. How do germs enter the body?
 - 77. Why should we eat healthy food?
 - 78. Why is sleep important?
 - 79. What is exercise?
 - 80. How does exercise help the body?
-

IX. Growth and Development

- 81. What is growth?
 - 82. How does a baby grow into an adult?
 - 83. What are changes in the body during growth?
 - 84. What are good habits for a healthy body?
 - 85. What is puberty?
 - 86. Why do we need energy?
 - 87. How does food help the body grow?
 - 88. Why do we need water?
 - 89. What are nutrients?
 - 90. What happens if we don't eat well?
-

X. Fun Facts and General Knowledge

- 91. Which is the largest organ in the body?
- 92. Which is the smallest bone in the human body?

93. Which organ controls the body?
 94. Which is the strongest muscle?
 95. How many teeth do adults have?
 96. Why do we blink?
 97. What is the function of eyebrows and eyelashes?
 98. What is the average temperature of the human body?
 99. Why do we get goosebumps?
 100. How does the body heal itself?
-

Food for Health

Here are the **Top 100 Questions on Food for Health**, categorized to make learning easier. These questions are excellent for students, health awareness programs, quizzes, and general education.

I. Introduction to Food and Health

1. What is food?

2. Why do we need food?
 3. How does food help us stay healthy?
 4. What is a balanced diet?
 5. What are nutrients?
 6. What is the importance of a healthy diet?
 7. What happens if we don't eat healthy food?
 8. How does food provide energy?
 9. How is food related to growth?
 10. How does food protect us from diseases?
-

II. Types of Nutrients

11. What are carbohydrates?
 12. What are proteins?
 13. What are fats?
 14. What are vitamins?
 15. What are minerals?
 16. What is roughage?
 17. What is water's role in our diet?
 18. Which foods are rich in carbohydrates?
 19. Which foods are rich in proteins?
 20. Which foods are rich in fats?
-

III. Sources of Nutrients

21. What are plant sources of food?
 22. What are animal sources of food?
 23. What are some foods rich in Vitamin A?
 24. What are foods rich in Vitamin C?
 25. What foods are good sources of calcium?
 26. What is the source of iron in our diet?
 27. Which food items contain fiber?
 28. Which foods help in bone strength?
 29. Which foods are good for the brain?
 30. Which foods help boost immunity?
-

IV. Meals and Daily Diet

31. What are the main meals of the day?
32. Why is breakfast important?
33. What is a healthy lunch?
34. What should be included in dinner?
35. What is snacking?
36. How can snacks be made healthy?
37. Why should we not skip meals?
38. What happens if we overeat?

39. What is portion control?

40. What is meal planning?

V. Balanced Diet

41. What makes a meal balanced?

42. What is the food pyramid?

43. How much water should we drink daily?

44. How can we include all food groups in a meal?

45. What are go, grow, and glow foods?

46. Why is variety in food important?

47. What are the signs of a poor diet?

48. What is malnutrition?

49. What is undernutrition?

50. What is overnutrition?

VI. Junk Food vs. Healthy Food

51. What is junk food?

52. Why is junk food unhealthy?

53. Give examples of junk food.

54. What are healthy alternatives to junk food?

55. How does sugar affect health?

- 56. What are the dangers of too much salt?
 - 57. What are the effects of soft drinks?
 - 58. How does processed food affect our body?
 - 59. What is fast food?
 - 60. Why should we eat homemade food?
-

VII. Food Hygiene and Safety

- 61. Why should we wash fruits and vegetables?
 - 62. What is food hygiene?
 - 63. How can food get contaminated?
 - 64. What is food poisoning?
 - 65. How should food be stored?
 - 66. Why is handwashing important before eating?
 - 67. What are foodborne illnesses?
 - 68. What is food adulteration?
 - 69. How to check for food expiry dates?
 - 70. What is the importance of clean utensils?
-

VIII. Food for Different Age Groups

- 71. What kind of food do babies need?
- 72. What food is good for growing children?

73. What food should teenagers eat?
 74. What is the best food for adults?
 75. What food is suitable for elderly people?
 76. How do nutritional needs change with age?
 77. Why do athletes need more energy-rich food?
 78. What kind of food should a pregnant woman eat?
 79. What food helps in faster recovery from illness?
 80. What food should sick people avoid?
-

IX. Traditional and Modern Diets

81. What is a traditional diet?
 82. Why are traditional foods healthier?
 83. What is the Mediterranean diet?
 84. What is a vegetarian diet?
 85. What is a vegan diet?
 86. What is a high-protein diet?
 87. What is intermittent fasting?
 88. What is the role of fermented foods?
 89. What are superfoods?
 90. What is organic food?
-

X. Food and Mental Health

91. How does food affect mood?
 92. What foods help reduce stress?
 93. Which foods improve memory?
 94. Can diet help with mental focus?
 95. What is brain food?
 96. How does sugar affect mental health?
 97. Can unhealthy food cause anxiety or depression?
 98. How does staying hydrated help the brain?
 99. What foods help you sleep better?
 100. How is overall well-being connected to food?
-

Housing and Clothing

Here are the **Top 100 Questions on Housing and Clothing**, thoughtfully categorized to support school-level learning, general knowledge, and exam preparation.

I. Housing – Basics and Importance

1. What is a house?
 2. Why do we need a house?
 3. What are the different types of houses?
 4. What are the basic features of a good house?
 5. How does a house protect us?
 6. What is a temporary house?
 7. What is a permanent house?
 8. What materials are used to build a house?
 9. What is a pucca house?
 10. What is a kutch house?
-

II. Types of Houses

11. What is an igloo?
12. Who lives in an igloo?
13. What is a tent?
14. Who uses tents?
15. What is a caravan?
16. What is a houseboat?
17. What is a stilt house?
18. Why are houses built on stilts in some regions?

19. What are huts made of?

20. What are apartments?

III. House Design and Structure

21. What is the roof of a house?

22. Why do houses have windows?

23. What is a ventilator?

24. Why should houses have proper ventilation?

25. What is the purpose of a chimney?

26. What are the common rooms in a house?

27. What is a kitchen used for?

28. What is a bathroom?

29. What are doors made of?

30. What materials are used for walls?

IV. Cleanliness and Safety in Homes

31. Why should we keep our house clean?

32. How can we keep our house clean?

33. What are the dangers of an untidy house?

34. Why should we dispose of garbage properly?

- 35. What are common household pests?
 - 36. How do we prevent mosquitoes in homes?
 - 37. What are fire safety measures at home?
 - 38. Why should houses be well-lit?
 - 39. What is a smoke detector?
 - 40. How do houses affect health?
-

V. Modern and Traditional Houses

- 41. What are traditional houses?
 - 42. Give examples of traditional Indian houses.
 - 43. What are modern houses?
 - 44. How do city houses differ from village houses?
 - 45. What is an eco-friendly house?
 - 46. What is an earthquake-resistant house?
 - 47. What is a green building?
 - 48. What is rainwater harvesting in homes?
 - 49. What are smart homes?
 - 50. How do weather conditions affect house design?
-

VI. Clothing – Basics and Importance

- 51. What is clothing?
 - 52. Why do we wear clothes?
 - 53. What are the functions of clothes?
 - 54. What are clothes made of?
 - 55. How do clothes protect us?
 - 56. Why do people in different places wear different clothes?
 - 57. What are seasonal clothes?
 - 58. Why should clothes be clean?
 - 59. What is a uniform?
 - 60. Why do students wear uniforms?
-

VII. Types of Clothes and Fabrics

- 61. What are natural fibers?
- 62. What are synthetic fibers?
- 63. What is cotton? How is it used?
- 64. What is wool?
- 65. What is silk?
- 66. What is polyester?
- 67. What are traditional Indian clothes?
- 68. What is a sari?
- 69. What is a kurta-pajama?

70. What clothes do people wear in cold regions?

VIII. Clothing According to Season

71. What clothes do we wear in summer?

72. What clothes are worn in winter?

73. What clothes are worn during the rainy season?

74. What are waterproof clothes?

75. What are thermal clothes?

76. Why should we wear cotton clothes in summer?

77. Why is wool good for winter?

78. What types of shoes are worn in different seasons?

79. What clothes protect us from rain?

80. What are breathable fabrics?

IX. Clothing According to Occasion

81. What are casual clothes?

82. What are formal clothes?

83. What do people wear for festivals?

84. What do we wear for sports?

85. What do doctors wear?

86. What do soldiers wear?
87. What do construction workers wear for safety?
88. What is traditional wedding attire in India?
89. What clothes are worn for swimming?
90. Why do professionals have dress codes?
-

X. Care and Maintenance of Clothes

91. Why should we keep our clothes clean?
92. How should we wash clothes?
93. What is ironing?
94. How should we store seasonal clothes?
95. What is dry cleaning?
96. What causes clothes to fade?
97. How can we reuse old clothes?
98. What is mending clothes?
99. Why is it important to wear neat clothes?
100. What does "dressing appropriately" mean?
-

Keeping Healthy and Safe

Here are the **Top 100 Questions on Keeping Healthy and Safe**, organized into helpful categories. These are ideal for students, quizzes, health education, and everyday awareness.

I. Basics of Health and Safety

1. What does it mean to be healthy?
 2. Why is it important to stay healthy?
 3. What is safety?
 4. Why is it important to stay safe?
 5. What are healthy habits?
 6. What are safety rules?
 7. What is hygiene?
 8. What are germs?
 9. How do germs spread?
 10. How can we protect ourselves from germs?
-

II. Healthy Eating

11. What is a balanced diet?

12. Why should we eat fruits and vegetables?
 13. What happens if we eat too much junk food?
 14. What are nutrients?
 15. Why is breakfast important?
 16. Why should we drink enough water?
 17. What are healthy snacks?
 18. What are the benefits of eating home-cooked meals?
 19. What should we avoid in our diet?
 20. How does good food help our body?
-

III. Personal Hygiene

21. Why should we bathe daily?
22. Why is brushing teeth important?
23. How often should we cut our nails?
24. Why should we wash our hands before eating?
25. How should we wash our hands properly?
26. Why should we keep our hair clean?
27. Why is wearing clean clothes important?
28. How can we keep our feet clean and healthy?
29. Why is it important to wash our face?
30. How do we keep our body free from germs?

IV. Exercise and Physical Activity

- 31. Why is exercise important?
 - 32. What are the different types of exercises?
 - 33. How does walking help our health?
 - 34. What is yoga?
 - 35. How does playing outdoor games keep us healthy?
 - 36. What is posture?
 - 37. Why should we sit properly?
 - 38. What are the benefits of stretching?
 - 39. How does physical activity affect the heart?
 - 40. How much exercise should children get daily?
-

V. Sleep and Rest

- 41. Why do we need sleep?
- 42. What happens when we don't sleep enough?
- 43. How many hours of sleep do children need?
- 44. Why is rest important after hard work?
- 45. What are the benefits of waking up early?
- 46. Why should we avoid screens before bedtime?
- 47. What is a healthy bedtime routine?

- 48. How does sleep affect our mood?
 - 49. What is a nap?
 - 50. Why should we avoid late-night snacks?
-

VI. Mental and Emotional Health

- 51. What is mental health?
 - 52. Why is it important to talk about feelings?
 - 53. How can we deal with stress?
 - 54. What should we do when we feel sad?
 - 55. How does exercise help our mind?
 - 56. Why is it important to spend time with family?
 - 57. What is kindness?
 - 58. How can we be kind to others?
 - 59. What is bullying and why is it harmful?
 - 60. What should you do if someone is being bullied?
-

VII. Safety at Home

- 61. Why should we not touch electrical appliances?
- 62. What is the danger of playing with sharp objects?
- 63. Why should we not run on wet floors?

64. Why should we keep medicine out of children's reach?
 65. Why should we turn off gas or stoves after use?
 66. What are fire safety rules?
 67. How do we use electrical items safely?
 68. What is a first aid box?
 69. What is the emergency number for ambulance in India?
 70. What should we do during an earthquake?
-

VIII. Safety on the Road

71. What are road safety rules?
 72. Why should we use the zebra crossing?
 73. What is a traffic light?
 74. What does the red light mean?
 75. Why should we wear a seatbelt?
 76. Why is wearing a helmet important?
 77. What are pedestrian safety tips?
 78. Why should we not use mobile phones while walking or driving?
 79. What is jaywalking?
 80. Why should children not play on the road?
-

IX. Safety at School and in Public

81. What are school safety rules?
 82. Why should we not run in corridors?
 83. What should you do if you get hurt at school?
 84. Why is it important to listen to your teacher?
 85. What should we do during fire drills?
 86. What are safety rules in public places?
 87. What should you do if you get lost?
 88. How can we be safe around strangers?
 89. What is personal space?
 90. Why should we not share personal items like water bottles?
-

X. Disease Prevention and Health Care

91. What is vaccination?
92. Why do we need vaccines?
93. What is COVID-19?
94. How do masks protect us?
95. What is social distancing?
96. What are symptoms of being sick?
97. When should we visit a doctor?
98. Why is regular health check-up important?
99. What is hand sanitizer?

100. What should we do to stay healthy during seasonal changes?

Air

Here are the **Top 100 Questions on Air**, thoughtfully grouped into categories. These are ideal for school students, competitive exams, quizzes, and general science learning.

I. Introduction to Air

1. What is air?
2. Why is air important?
3. Can we see air?
4. Can we feel air?
5. What are the properties of air?
6. Is air present everywhere?
7. How do we know air occupies space?
8. Does air have weight?

9. How do plants and animals use air?
 10. What happens if there is no air?
-

II. Composition of Air

11. What is air made of?
 12. What is oxygen?
 13. What is nitrogen?
 14. What is carbon dioxide?
 15. What is water vapor?
 16. What percentage of air is oxygen?
 17. Which gas is the most in air?
 18. What is the role of oxygen in air?
 19. How does carbon dioxide enter the air?
 20. What is the importance of nitrogen?
-

III. Uses of Air

21. Why do humans need air?
22. How do animals use air?
23. How do plants use air?
24. What is the role of air in respiration?

25. What is combustion and how is air involved?

26. How is air used in windmills?

27. What is air pressure?

28. How is air used in balloons?

29. How do planes and birds fly using air?

30. How is air used in sports?

IV. Air Movement (Wind)

31. What is wind?

32. How is wind formed?

33. What is a breeze?

34. What is a gust of wind?

35. What is a storm?

36. What is a cyclone?

37. What is the difference between wind and air?

38. What is wind energy?

39. How are wind directions measured?

40. What is a wind vane?

V. Clean Air and Pollution

- 41. What is clean air?
 - 42. What is air pollution?
 - 43. What are pollutants?
 - 44. What causes air pollution?
 - 45. How does vehicle smoke pollute the air?
 - 46. What is smog?
 - 47. What is the effect of smoking on air?
 - 48. How does burning garbage pollute air?
 - 49. What are the health effects of air pollution?
 - 50. How does air pollution affect children?
-

VI. Protecting Air Quality

- 51. How can we keep the air clean?
- 52. Why should we plant more trees?
- 53. How can we reduce smoke from factories?
- 54. What is afforestation?
- 55. How does using public transport reduce air pollution?
- 56. Why should we not burn crackers?
- 57. How do electric vehicles help the air?
- 58. What is the role of the government in air protection?
- 59. How can schools help reduce air pollution?

60. What are eco-friendly practices?

VII. Air and Health

61. What happens if we breathe dirty air?

62. What is asthma?

63. What are respiratory diseases?

64. How does air affect the brain?

65. Why should we breathe fresh air?

66. How can we check air quality?

67. What is the Air Quality Index (AQI)?

68. What is indoor air pollution?

69. What are symptoms of poor air quality?

70. How can masks help us breathe clean air?

VIII. Air in Science Experiments

71. How do we prove that air is present?

72. How can we show air occupies space?

73. How can we show air has pressure?

74. How can we trap air in water?

75. What happens when air is compressed?

- 76. What is vacuum?
 - 77. What is an air pump?
 - 78. What is the role of air in parachutes?
 - 79. What is an airbag?
 - 80. What is the role of air in tire inflation?
-

IX. Air and Weather

- 81. How does air affect weather?
 - 82. What is atmospheric pressure?
 - 83. What is a weather balloon?
 - 84. What is humidity?
 - 85. What are air currents?
 - 86. How does hot air rise?
 - 87. What is the role of air in rainfall?
 - 88. What is wind chill?
 - 89. How do meteorologists study air?
 - 90. What is the troposphere?
-

X. Fun Facts and Advanced Knowledge

- 91. What is the atmosphere?

92. What are the layers of the atmosphere?
 93. Why is there no air in space?
 94. What is compressed air?
 95. How does a vacuum cleaner use air?
 96. What is the speed of wind?
 97. What are air-breathing animals?
 98. What is a barometer?
 99. How do air molecules behave?
 100. Why do astronauts need oxygen tanks?
-

Water

Here are the **Top 100 Questions on Water**, organized into categories to support learning, quizzes, and general knowledge for students and educators.

I. Introduction to Water

1. What is water?
 2. Why is water important for life?
 3. Can we live without water?
 4. What are the main uses of water?
 5. What are the properties of water?
 6. Is water a solid, liquid, or gas?
 7. What is the boiling point of water?
 8. What is the freezing point of water?
 9. What is the chemical formula of water?
 10. What is potable water?
-

II. Sources of Water

11. What are the natural sources of water?
12. What is surface water?
13. What is groundwater?
14. What is rainwater?
15. What are the main sources of freshwater?
16. What is a river?
17. What is a lake?
18. What is an ocean?

19. What is a glacier?

20. What is a well?

III. The Water Cycle

21. What is the water cycle?

22. What is evaporation?

23. What is condensation?

24. What is precipitation?

25. What is collection in the water cycle?

26. What role does the sun play in the water cycle?

27. How are clouds formed?

28. What causes rainfall?

29. What is transpiration?

30. How does water return to the earth?

IV. Uses of Water

31. How do humans use water daily?

32. How do animals use water?

33. How do plants use water?

34. Why is water important for agriculture?

- 35. What is irrigation?
 - 36. What is domestic use of water?
 - 37. What is industrial use of water?
 - 38. How is water used in transportation?
 - 39. How is water used for recreation?
 - 40. What is hydroelectric power?
-

V. Water Bodies

- 41. What is a pond?
 - 42. What is a stream?
 - 43. What is a sea?
 - 44. What is the difference between a lake and a river?
 - 45. What is a delta?
 - 46. What is an estuary?
 - 47. Name the largest ocean on Earth.
 - 48. What is the source of the Ganga River?
 - 49. What are man-made water bodies?
 - 50. What is a reservoir?
-

VI. Water Conservation

51. What is water conservation?
 52. Why should we save water?
 53. How can we save water at home?
 54. What is rainwater harvesting?
 55. What is drip irrigation?
 56. What are water-saving devices?
 57. Why should we fix leaking taps?
 58. How can students help conserve water?
 59. What is reuse of water?
 60. What is the slogan for saving water?
-

VII. Water Pollution

61. What is water pollution?
62. What causes water pollution?
63. What are the effects of water pollution?
64. How does water pollution affect health?
65. What are pollutants?
66. What are industrial waste and sewage?
67. How can we prevent water pollution?
68. Why is dumping plastic in water harmful?
69. What is eutrophication?

70. What is the role of wetlands in filtering water?

VIII. Properties of Water

- 71. What is the density of water?
 - 72. Why is water called a universal solvent?
 - 73. Does water have taste, color, or smell?
 - 74. Why does ice float on water?
 - 75. What is surface tension?
 - 76. How does water dissolve substances?
 - 77. What is capillary action?
 - 78. Why does water expand when frozen?
 - 79. Can water conduct electricity?
 - 80. What are hard and soft water?
-

IX. Drinking Water and Treatment

- 81. What is safe drinking water?
- 82. How do we purify water?
- 83. What is filtration?
- 84. What is boiling?
- 85. What is chlorination?

86. What is a water purifier?
 87. What is a water treatment plant?
 88. What is fluoride in water?
 89. What diseases are caused by unsafe water?
 90. How can we test if water is clean?
-

X. Fun Facts and Advanced Concepts

91. What percentage of Earth is covered with water?
 92. How much of Earth's water is freshwater?
 93. What is desalination?
 94. Why is seawater salty?
 95. What is greywater?
 96. Can we run out of water?
 97. What is virtual water?
 98. What is groundwater recharge?
 99. What is the importance of wetlands?
 100. How can we educate others to save water?

Weather and Seasons

Here are the **Top 100 Questions on Weather and Seasons**, grouped into helpful categories. These questions are ideal for school students, quizzes, science projects, and general knowledge.

I. Basics of Weather

1. What is weather?
 2. What are the elements of weather?
 3. What causes changes in weather?
 4. How do we measure temperature?
 5. What is a thermometer?
 6. What is humidity?
 7. What is wind?
 8. What is a weather report?
 9. What is a weather forecast?
 10. Who studies weather?
-

II. Types of Weather

11. What is sunny weather?
 12. What is cloudy weather?
 13. What is rainy weather?
 14. What is windy weather?
 15. What is foggy weather?
 16. What is snowy weather?
 17. What is stormy weather?
 18. What is a thunderstorm?
 19. What is a cyclone?
 20. What is a tornado?
-

III. Weather Instruments

21. What is a thermometer used for?
22. What is a barometer?
23. What is a rain gauge?
24. What is a wind vane?
25. What is an anemometer?
26. How do weather satellites help?
27. What is a hygrometer?
28. What tools are used in weather stations?
29. What is radar used for in weather prediction?

30. What is a weather balloon?

IV. Seasons – General Understanding

31. What is a season?

32. How many seasons are there?

33. What causes seasons?

34. What is the role of Earth's tilt in seasons?

35. How do seasons affect the length of day and night?

36. Why do different places have different seasons?

37. How does distance from the equator affect seasons?

38. What is a solstice?

39. What is an equinox?

40. How are seasons different near the poles?

V. Spring Season

41. When does spring occur?

42. What are the features of spring?

43. What clothes do we wear in spring?

44. What do plants do in spring?

45. What festivals occur in spring?

- 46. What changes happen in nature during spring?
 - 47. Why is spring called the season of flowers?
 - 48. How do animals behave in spring?
 - 49. What foods are common in spring?
 - 50. What are common activities during spring?
-

VI. Summer Season

- 51. When does summer occur?
 - 52. What are the features of summer?
 - 53. What is the hottest time of the day?
 - 54. What clothes do we wear in summer?
 - 55. What foods keep us cool in summer?
 - 56. What drinks help in summer?
 - 57. What are heatwaves?
 - 58. What is a sunstroke?
 - 59. How can we protect ourselves in summer?
 - 60. How does summer affect animals and plants?
-

VII. Autumn (Fall) Season

- 61. When does autumn occur?

- 62. What are the features of autumn?
 - 63. Why do leaves fall in autumn?
 - 64. What colors do trees turn in autumn?
 - 65. What fruits and vegetables grow in autumn?
 - 66. What festivals are celebrated in autumn?
 - 67. How does weather change in autumn?
 - 68. What clothes do we wear in autumn?
 - 69. How do animals prepare for winter in autumn?
 - 70. What are harvest festivals?
-

VIII. Winter Season

- 71. When does winter occur?
- 72. What are the features of winter?
- 73. What is frost?
- 74. What is snowfall?
- 75. What clothes keep us warm in winter?
- 76. What foods are eaten in winter?
- 77. How do we keep homes warm in winter?
- 78. What activities are common in winter?
- 79. What happens to animals in winter?
- 80. What is hibernation?

IX. Rainy/Monsoon Season

- 81. When does the rainy season occur in India?
- 82. What are monsoons?
- 83. What causes rain?
- 84. Why is rain important?
- 85. What are raincoats and umbrellas used for?
- 86. What are floods?
- 87. How can rain damage crops?
- 88. How do farmers depend on rain?
- 89. What safety tips should we follow during heavy rains?
- 90. How does rain help plants?

X. Climate, Weather Patterns & Global Impact

- 91. What is the difference between weather and climate?
- 92. What is climate change?
- 93. How does weather affect our mood?
- 94. What is global warming?
- 95. How do natural disasters relate to weather?
- 96. What is El Niño?
- 97. How does weather affect travel?

98. How is climate different in deserts and mountains?
99. How do animals adapt to seasonal changes?
100. What can we do to stay safe in extreme weather?

The Sun, Moon, and the Stars

Here are the **Top 100 Questions on the Sun, Moon, and the Stars**, carefully categorized to support school learning, general knowledge, quizzes, and science exploration.

I. The Sun – Basic Understanding

1. What is the Sun?
2. Is the Sun a star?
3. How far is the Sun from Earth?
4. Why is the Sun important to life on Earth?
5. What is the temperature of the Sun?
6. What is the Sun made of?

7. How does the Sun produce energy?
 8. What is solar energy?
 9. What is sunlight?
 10. Why does the Sun appear to rise in the east?
-

II. The Sun's Role and Effects

11. How does the Sun affect Earth's climate?
 12. What is photosynthesis?
 13. How does sunlight help plants?
 14. How does the Sun cause day and night?
 15. What is sunrise and sunset?
 16. Why do shadows form?
 17. Why are shadows longer in the morning and evening?
 18. How do animals and humans depend on the Sun?
 19. What are solar panels?
 20. What would happen if the Sun disappeared?
-

III. The Moon – Basic Understanding

21. What is the Moon?
22. Is the Moon a planet or a satellite?

23. Why does the Moon shine?
 24. How far is the Moon from Earth?
 25. What is the surface of the Moon like?
 26. Does the Moon have air?
 27. Does the Moon have water?
 28. Can anything live on the Moon?
 29. What are craters on the Moon?
 30. What is gravity on the Moon?
-

IV. Phases of the Moon

31. What are the phases of the Moon?
 32. What is a new moon?
 33. What is a full moon?
 34. What is a crescent moon?
 35. What is a half moon?
 36. How many days does the Moon take to complete one cycle?
 37. Why does the Moon change shape?
 38. What is waxing and waning of the Moon?
 39. How can we observe the Moon safely?
 40. What is a lunar calendar?
-

V. Eclipses

41. What is an eclipse?
 42. What is a solar eclipse?
 43. What is a lunar eclipse?
 44. How often do eclipses happen?
 45. Is it safe to look at an eclipse?
 46. What causes a solar eclipse?
 47. What causes a lunar eclipse?
 48. What is total and partial eclipse?
 49. How long does an eclipse last?
 50. What safety measures should we take during an eclipse?
-

VI. The Stars – Basic Understanding

51. What are stars?
52. How are stars different from planets?
53. Why do stars twinkle?
54. Why do stars look small?
55. What is the closest star to Earth?
56. What is a constellation?
57. How many stars can we see at night?
58. What are shooting stars?

59. What is a galaxy?
60. What is the Milky Way?
-

VII. Famous Stars and Constellations

61. What is the North Star?
62. How does the North Star help in navigation?
63. What is Orion?
64. What is Ursa Major?
65. What is Ursa Minor?
66. What is the Southern Cross?
67. Can constellations be seen all year?
68. How do astronomers name stars?
69. What are binary stars?
70. How do stars help us tell time?
-

VIII. Space Exploration

71. Who was the first person to walk on the Moon?
72. What was the Apollo 11 mission?
73. What are space telescopes?
74. What is a space shuttle?

- 75. What is a satellite?
 - 76. What is a space station?
 - 77. What is a rocket?
 - 78. What does ISRO do?
 - 79. What does NASA do?
 - 80. What is a space observatory?
-

IX. Solar System and Celestial Events

- 81. What is the solar system?
 - 82. What are planets?
 - 83. How many planets are there in the solar system?
 - 84. What are asteroids?
 - 85. What is a comet?
 - 86. What is a meteor?
 - 87. What is a meteor shower?
 - 88. What are the inner and outer planets?
 - 89. How do celestial bodies move?
 - 90. What are orbits?
-

X. Fun Facts and Advanced Knowledge

91. Why does the Moon look bigger on some nights?
 92. Can we ever touch the Sun?
 93. What are solar flares?
 94. How big is the Sun compared to the Earth?
 95. Can we live on the Moon someday?
 96. What are artificial moons?
 97. Why do we see the Moon during the day sometimes?
 98. Why are there no stars visible during the daytime?
 99. How long does it take light from the Sun to reach Earth?
 100. What are black holes, and are they stars?
